
Roadcraft Manual Chapter 2 Exam Questions With Answers

What is the Manual Objective? - AnswerThe object of this manual is to raise the level of driving by teaching a uniform and methodical system which will provide an increased margin of safety at all times

/.Define Quiet Efficiency? - AnswerQuiet efficiency is the hallmark of the expert. Although alert you give the impression of being completely relaxed. You drive in a calm, controlled style without fuss or flourish, progressing smoothly and unobtrusively. You will always be in the right place on the road, travelling at the right speed with the right gear engaged and you achieve this desirable state by concentrating all the time, planning ahead and driving systematically

/.Define the Police System of Car Control? - AnswerThe police system of car control creates a simple and repetitive method of driving which ensures that you omit no detail, leave nothing to chance and when perfected gives that one ingredient essential to safe driving - TIME TO REACT

/.What is a hazard and what are the three main types? - AnswerA hazard is anything which contains an element of actual or potential danger

The three main types are:

- 1.) Physical features such as a junction, roundabout, bend or hillcrest.
- 2.) Those created by the position or movement of other road users.
- 3.) Those created by variations in the road surface or weather conditions.

/.Define the System of Car Control? - AnswerThe system of car control is a system or drill, each feature of which is to be considered, in sequence, by the driver at the approach to any hazard

/.What are the six features of the System of Car Control? - Answer1.) Mirrors, Course - Having seen the hazard, you decide on the correct line of approach. You look into your mirrors and if it is necessary to change position to obtain the correct course, consideration is given to a deviation signal.

2.) Mirrors, Signals and Speed - The mirrors are again used and if your intention is to turn left or right at the hazard, consider a deviation signal. Any reduction of speed for the hazard is accomplished at this stage, preceded by a slowing down signal, if appropriate.

3.) Gear - The correct gear is selected for the speed of the vehicle following the application of the second feature.

4.) Mirrors and Signals - It is essential to look in the mirrors again and to consider a signal to deviate, if not previously given, or to emphasize an existing deviation signal.
