at around 275 feet from the base which was also measured at 100 feet wide The General Sherman is not only known as the largest tree but it has also been named as the largest living organism of the earth The people know about the Redwoods as the home to the tallest trees in the world But apart from housing the giant trees Redwood parks and forests still cover and protect large prairies gushing river ways oak woodlands and a long 40 mile stretch of primeval coastline making up an abundantly rich wildlife environment characterized by great diversity These natural beauties serve not only as a source of enjoyment but also of inspiration and education to the people
