

English Research Paper: Overview

Objective One

Distributed: Wednesday, February 2, 2011

Due: Friday, February 4, 2011

The English Research Paper is the culminating project and assessment of all the writing, reading, and research techniques you have accumulated throughout the course of the year. This vital and pivotal piece of the curriculum affords an opportunity to demonstrate the ability to read, write, speak, apply knowledge, problem solve, and use a myriad of life skills such as time management, organization, and risk-taking and will occur from March until May. The two (2) components of the project are as follows:

Research Paper

The student will self-select and research a topic in which he/she has an interest. The culmination of the research work is a 1250 word (4-5 text pages) research paper organized around a clearly stated thesis and adhering to standard documentation forms (MLA Handbook) and standard manuscript guidelines. Submitted in the fourth marking period, the research paper and standard manuscript grades will appear in the student's fourth marking period Assessment category of grades. The paper will count for 200 points in the Assessment category. **The paper is due on Friday, April 15, 2011 and must be posted on turnitin.com.**

Oral Presentation and Defense

The student will present his/her project to the class. This is not a reading of the paper but a dynamic presentation of the work using visual aids, constructed models, videos, or any other approved media. The student must interact with the class and teacher during the presentation. The Oral Presentation will take place during the fourth marking period and will be reflected in the fourth marking period Assessment categories of grades. The speech will count for 200 points in the Assessment category. **The presentations will take place from May 17-20, 2011.**

Note

In order for this process to be a successful learning experience, this Objectives Packet enables the student to approach this project in a measured way, with each component having a separate due date. Language, research, speaking, and writing assignments given to students during the course of the semester afford opportunities to practice and to perfect further the skills necessary to successfully meet the objectives required to successfully complete the research paper. Students and parents should note that students and their families can locate information, extra copies, and models for all of the needed research requirements on our class website.

Although we will have many opportunities to visit the library in school and to work on writing during class, students are expected to work independently at home and during study halls, if needed. Please also consider that academic programs will still be occurring; therefore, students should manage their time wisely in order to prepare for quizzes, exams, and other academic responsibilities that may be unrelated to the research project.

First Time Up Brock Dethier, 2008-09-30 First time up an insider s friendly question from 1960s counter culture perfectly captures the spirit of this book A short supportive practical guide for the first time college composition instructor the book is upbeat wise but friendly casual but knowledgeable like the voice that may have introduced you to certain other firsts With an experiential focus rather than a theoretical one First Time Up will be a strong addition to the newcomer s professional library and a great candidate for the TA practicum reading list Dethier author of The Composition Instructor s Survival Guide and From Dylan to Donne directly addresses the common headaches nightmares and epiphanies of composition teaching especially the ones that face the new teacher And since legions of new college composition teachers are either graduate instructors TAs or adjuncts without a formal background in composition studies he assumes these folks as his primary audience Dethier s voice is casual but it conveys concern humor experience and reassurance to the first timer He addresses all major areas that graduate instructors or new adjuncts in a writing program are sure to face from career anxiety to thoughts on grading and keeping good classroom records Dethier s own eclecticism is well represented here but he reviews with considerable deftness the value of contemporary scholarship to first time writing

instructors many of whom will be impatient with high theory Throughout the work he affirms a humane confident approach to teaching along with a true affection for college students and for teachers just learning to deal with them **U.S. Forest Service Research Paper NC.** North Central Forest Experiment Station (Saint Paul, Minn.),1968 **Communicating**

Science: A Practical Guide For Engineers And Physical Scientists Edith S Boxman,Reuven (Raymond) L

Boxman,2016-12-28 The book under review is indeed a guide and a practical one too but it is not only for engineers and physical scientists it is useful to all those who communicate technical information or need to and want to do the job well The book achieves the objectives every PhD student may not want to read the book but should and will not regret it European Science EditingRead this book before you write your thesis or journal paper Communicating Science is a textbook and reference on scientific writing oriented primarily at researchers in the physical sciences and engineering It is written from the perspective of an experienced researcher It draws on the authors experience of teaching and working with both native English speakers and English as a Second Language ESL writers For the range of topics covered this book is relatively short and tersely written in order to appeal to busy researchers Graduate students and early career researchers will be guided through the researcher s basic communication tasks writing theses journal papers and internal reports presenting lectures and posters and preparing research proposals Extensive best practice examples and analyses of common problems are presented Advanced researchers who aim to commercialize their research results will be introduced to business plans and patents so that they can communicate optimally with patent attorneys and business analysts Likewise advanced researchers will be assisted in conveying the results of their research to the industrial and business community governmental circles and the general public in the chapter on popular media Researchers at all levels will find the chapter on CV s and job hunting helpful The Writing Well chapter will assist researchers to improve their English usage in scientific writing This chapter is oriented both at native English speakers who have an intuitive command of English but often lack formal instruction on grammar and structure and non native English writers who often have had formal instruction but lack intuitive grasp of what sounds good Mentors will find the book a useful tool for systematically guiding their students in their early writing efforts If your students read this book first you will save time Communicating Science may serve as a textbook for graduate level courses in scientific writing **Research in Education** ,1974 Intelligent Computing Theories and Application

Does God Belong in Public Schools? Kent Greenawalt, 2009-01-10 Controversial Supreme Court decisions have barred organized school prayer but neither the Court nor public policy exclude religion from schools altogether In this book one of America's leading constitutional scholars asks what role religion ought to play in public schools Kent Greenawalt explores many of the most divisive issues in educational debate including teaching about the origins of life sex education and when or whether students can opt out of school activities for religious reasons Using these and other case studies Greenawalt considers how to balance the country's constitutional commitment to personal freedoms and to the separation of church and state with the vital role that religion has always played in American society Do we risk distorting students understanding of America's past and present by ignoring religion in public school curricula When does teaching about religion cross the line into the promotion of religion Tracing the historical development of religion within public schools and considering every major Supreme Court case Greenawalt concludes that the bans on school prayer and the teaching of creationism are justified and that the court should more closely examine such activities as the singing of religious songs and student papers on religious topics He also argues that students ought to be taught more about religion

both its contributions and shortcomings especially in courses in history To do otherwise he writes is to present a seriously distorted picture of society and indirectly to be other than neutral in presenting secularism and religion Written with exemplary clarity and even handedness this is a major book about some of the most pressing and contentious issues in educational policy and constitutional law today

Constructional and Cognitive Explorations of Contrastive Linguistics Annalisa Baicchi,Cristiano Broccias,2024-02-22 This book approaches the field of contrastive linguistics from a comparative and robust perspective that combines the tenets of construction grammar and cognitive linguistics In doing so it shows how their integration can help to successfully enhance research on contrastivity by means of updated theoretical frameworks and applied methodologies that combine language and thought It compares ten different languages and offers analyses of constructions at all levels of the linguistic organization identifying the cognitive motivations that instantiate the linguistic data retrieved from corpora Relevant to both cognitive and non cognitive linguists interested in variation and contrastive approaches as well as graduate students in these areas this book makes a significant contribution to existing work on the various types of constructional and discourse based phenomena in modern languages
