Military Astrology in Late Medieval Italy Robert S. Hand,2014 This study examines the thirteenth century astrologer

Guido Bonatti s *Liber astronomicus* as a case study to investigate one aspect of the many practical applications of astrology

in the later Middle Ages Specifically it looks at the application of military astrology to analyze Bonatti s use of his source

material in relation to his own practice The dissertation develops a methodology to discern the astrologer s practice from his

textual inheritance Bonatti was possibly the most important astrologer of the high middle ages His work was an encyclopedic

yet detailed survey of the entire field of astrological study in the Europe of his day He acknowledged his Arab sources but

was not merely a compiler of their material Like many of his European contemporaries in other fields such as Thomas

Aquinas Albertus Magnus and Roger Bacon Bonatti put his own stamp on the field of astrology Staying within the basic

traditions as he inherited them he systematized and expanded often terse material and frequently innovated in certain

applications of astrology By close and detailed examinations of Bonatti s text and comparison with his sources we can see the

changes that reflect his personal experience which in turn caused him to alter and emend the tradition From this we can

distinguish the practitioner from the compiler of astrological materials This study argues that such close internal textual

analysis of the astrological treatises themselves reveals the medieval uses of astrology far better than external narrative

sources Ultimately over the course of this study it also becomes clear that in the area of astrology Bonatti carried out the

same kinds of intellectual synthesis and systematization that we see in the works of notable contemporaries in other fields
