development of socio emotional skills In fact most efforts to develop socio emotional skills are embedded within innovative education and training curricula as well as pedagogical and classroom practices Evidence shows that programs are particularly effective when targeted to highly vulnerable populations and in particular to young children Overall findings indicate that high quality programs for young children tend to foster cognitive abilities in the short run and to impact socio emotional skills over the long run Programs for students enrolled in formal education primary and secondary levels show positive and significant impacts on the outcomes reviewed The most successful of these programs are implemented school wide and follow the SAFE approach that is they are appropriately sequenced active focused and explicit Finally the review finds that programs for out of school children and youth are usually designed as a means of achieving immediate labor market outcomes e g job placement formal employment and higher wages While some of these programs show positive and statistically significant impacts on socio emotional skills the impacts tend to be small
