- [GCT2 – Practice Test](#)

Last-Minute Checklist

1. Know the exact date, time and location of the test administration session.
2. Bring to the test session:
 1. your **Personal Record Identifier** (PRI, if you are a public servant)
 2. one piece of **signature and photo identification**
 3. a calculator (if you wish)
 4. a watch (if you wish)

If you have a disability and you require special testing accommodations, you are responsible to notify the test administrators well in advance of the testing date so that they can take the necessary steps to determine the appropriate accommodations for your specific needs.

Taking the GCT2: General Test-Taking Tips & Information

1. Read this entire publication and be sure to complete the practice test following all of the instructions. Doing so will help you to become familiar with the GCT2 and to work at the appropriate pace.
2. If you want additional practice, you may wish to consult the reference sections in a local public library, or in bookstores, for preparation books on standardized tests.
3. Try employment tests and school tests (whether or not they count for something) as well as tests, quizzes and puzzles in magazines, newspapers and quiz books. If there are no time limits, set them yourself.
4. Read the whole question and look at all of the answer choices before choosing an answer. It is often a mistake to think that because the first or second answer choice looks good to you, you do not need to read the remaining choices.
5. Pace yourself: Since each question is worth the same amount (1 point), you should try to do as many of the questions as you can. While estimating the average amount of time to be spent on each question is useful, you should note that the questions on the test are increasingly more difficult toward the end and, therefore, may require more time to solve.
6. Make sure the numbered space on the answer sheet matches the number of the question you are answering. Remember that if you skip a question you must also skip the corresponding answer space on the answer sheet.

The program provides food for thought and inspiration for practice for everyone with an interest in mathematics education and makes an essential reference for teacher educators curriculum developers and researchers in mathematics education. The work includes the texts of the four plenary lectures and three plenary panels and reports of three survey groups five National presentations the abstracts of fifty one Regular lectures reports of thirty seven Topic Study Groups and seventeen Discussion Groups.

Sustainable Development Research and Practice in Mexico and Selected Latin American Countries Walter Leal Filho, Ricardo Noyola-Cherpitel, Pedro Medellín-Milán, Valeria Ruiz Vargas, 2017-11-27. This book provides an essential overview of sustainable development research in Mexico. It discusses the empirical research methods and findings as well as practical initiatives and projects being pursued in Mexico and other countries in the region. Although a number of Mexican universities are now conducting high quality research on matters related to sustainable development there are few publications that offer a multidisciplinary overview of research efforts for a broader audience. This book addresses that gap in the literature providing researchers at Mexican universities including those from other countries working in Mexico with an opportunity to present their work i.e. curriculum innovations empirical work activities case studies and practical projects. As such it fosters the exchange of information ideas and experiences successful initiatives and best practices.

Mathematical Modelling in Education Research and Practice Gloria Ann Stillman, Werner Blum, Maria Salett Biembengut, 2015-07-20. In this volume cultural social and cognitive influences on the research and teaching of mathematical modelling are explored from a variety of theoretical and practical perspectives. The authors of the current volume are all members of the International Community of Teachers of Mathematical Modelling and Applications the peak research body in this field. A distinctive feature of this volume is the high number of authors from South American countries. These authors bring quite a different perspective to modelling than has been showcased in previous books in this series in particular from a cultural point of view. As well as recent international research there is a strong emphasis on pedagogical issues including those associated with technology and assessment in the teaching and learning of modelling. Applications at various levels of education are exemplified. The contributions reflect common issues shared globally and represent emergent or on going challenges.
