Richard Hess,Allison E. Ray,Timothy G. Rials,2020-03-12 The success of lignocellulosic biofuels and biochemical industries depends upon an economic and reliable supply of quality biomass However research and development efforts have historically focused on the utilization of agriculturally derived cellulosic feedstocks without consideration of their low energy density high variations in physical and chemical characteristics and potential supply risks in terms of availability and affordability This Research Topic will explore strategies that enable supply chain improvements in biomass quality and consistency through blending preprocessing diversity and landscape design for development of conversion ready lignocellulosic feedstocks for production of biofuels and bio products Biomass variability has proven a formidable challenge to the emerging biorefining industry impeding continuous operation and reducing yields required for economical production of lignocellulosic biofuels at scale Conventional supply systems lack the preprocessing capabilities necessary to ensure consistent biomass feedstocks with physical and chemical properties that are compatible with supply chain operations and conversion processes Direct coupling of conventional feedstock supply systems with sophisticated conversion systems has reduced the operability of biorefining processes to less than 50% As the bioeconomy grows the inherent variability of biomass resources cannot be managed by passive means alone As such there is a need to fully recognize the magnitude of biomass variability and uncertainty as well as the cost of failing to design feedstock supply systems that can mitigate biomass variability and uncertainty A paradigm shift is needed from biorefinery designs using raw single resource biomass to advanced feedstock supply systems that harness diverse biomass resources to enable supply chain resilience and development of conversion ready feedstocks Blending and preprocessing e g drying sorting sizing fractionation leaching densification etc can mitigate variable quality and performance in diverse resources when integrated with downstream conversion systems Decoupling feedstock supply from biorefining provides an opportunity to manage supply risks and incorporate value added upgrading to develop feedstocks with improved convertibility and or market fungibility Conversion ready feedstocks have undergone the required preprocessing to ensure compatibility with conversion and utilization prior to delivery at the biorefinery and represent lignocellulosic biomass with physical and chemical properties that are tailored to meet the requirements of industrially relevant handling and conversion systems *Microbicides in Coatings* Frank Sauer,2017-07-04 All about biocides for coatings When it comes to protecting coatings it is essential to strike the right balance between controlling germs in order to avoid economic damage on the one hand and tolerating microbial life where it is necessary and useful on the other The new book from Frank Sauer provides a comprehensive overview of the working

mechanisms and possible applications of microbicides for coatings invaluable for formulators and technicians as well as for business people with a basic knowledge of chemistry and biology

Financial Cryptography and Data Security Rainer Böhme, Tatsuaki Okamoto, 2015-07-15 This book constitutes the thoroughly refereed post conference proceedings of the 19th International Conference on Financial Cryptography and Data Security FC 2014 held in San Juan Puerto Rico in January 2015. The 23 revised full papers and 10 short papers were carefully selected and reviewed from 102 full papers submissions. The papers are grouped in the following topical sections: sidechannels, cryptography in the cloud, payment and fraud detection, authentication and access control, cryptographic primitives, mobile security, privacy and incentives, applications and attacks, authenticated data structures.

Business and Institutional Translation Éric Poirier, Daniel Gallego-Hernández, 2018-11-12 The volume of economic business financial and institutional translation increases daily. Governments strive to produce plain and accessible information. Institutions and agencies operate in more than one language. Multinationals produce documents in multiple languages to expand their services worldwide and large businesses and SMEs also have to adopt a multilingual approach for accessing new markets in new countries. Translation and interpreting training institutions are aware of the increasing need for training in this area. This awareness is evident in their curricula which include subjects related to these areas of activity. Trainers and researchers are increasingly interested in knowing and researching the intricacies and aspects of this type of translation. This peer reviewed publication resulting from ICEBFIT 2016 echoes the voices of translation practitioners, researchers and teachers as well as other parties gathered to discuss new issues in institutional translation and business finance and accounting translation as well as in a larger sense specialized translation.
