November 2010 Social Sciences Memo

Nayef R.F. Al-Rodhan

November 2010 Social Sciences Memo:

Cold War Social Science M. Solovey, H. Cravens, 2012-01-30 From World War II to the early 1970s social science research expanded in dramatic and unprecedented fashion in the United States This volume examines how why and with what consequences this rapid and yet contested expansion depended on the entanglement of the social sciences with the Cold War

The Obama Presidency in the Constitutional Order Carol McNamara, Melanie Marlowe, 2012-08-10 The Obama administration is shaping up to be one of the most consequential in recent American history In this book a diverse group of presidential scholars step back from the partisan debate to consider the first two years of the Obama presidency through the lens of the U S constitution s theory structure and powers They ask how Barack Obama understands and exercises the President s formal constitutional and informal powers and responsibilities of the president from foreign policy and public policy to his political leadership of the Democratic party and the nation as a whole This timely first look at the Obama presidency establishes a constitutional yardstick of interest to scholars of the presidency constitutional thought and American political thought

Harvard's Quixotic Pursuit of a New Science Patrick L. Schmidt, 2022-06-21 In Harvard s Quixotic Pursuit of a New Science Patrick L Schmidt tells the little known story of how some of the most renowned social scientists of the twentieth century struggled to elevate their emerging disciplines of cultural anthropology sociology and social and clinical psychology Scorned and marginalized in their respective departments in the 1930s for pursuing the controversial theories of Freud and Jung they persuaded Harvard to establish a new department promising to create an interdisciplinary science that would surpass in importance Harvard s big three disciplines of economics government and history Although the Department of Social Relations failed to achieve this audacious goal it nonetheless attracted an outstanding faculty produced important scholarly work and trained many notable graduates At times it was a wild ride Some faculty became notorious for their questionable research Timothy Leary and Richard Alpert reborn as Ram Dass gave the psychedelic drug psilocybin to students while Henry Murray traumatized undergraduate Theodore Kaczynski later the Unabomber in a three year long experiment Central to the story is the obsessive quest of legendary sociologist Talcott Parsons for a single theory unifying the social sciences the white whale to his Captain Ahab All in all Schmidt s lively narrative is an instructive tale of academic infighting hubris and scandal

The Long Decade Christopher David Jenkins, Amanda Jacobsen, Anders Henriksen, 2014 The terrorist attacks of 9 11 precipitated significant legal changes over the ensuing ten years a long decade that saw both domestic and international legal systems evolve in reaction to the seemingly permanent threat of international terrorism At the same time globalization produced worldwide insecurity that weakened the nation state s ability to monopolize violence and assure safety for its people The Long Decade How 9 11 Changed the Law contains contributions by international legal scholars who critically reflect on how the terrorist attacks of 9 11 precipitated these legal changes This book examines how the uncertainties of the long decade made fear a political and legal force

challenged national constitutional orders altered fundamental assumptions about the rule of law and ultimately raised questions about how democracy and human rights can cope with competing security pressures while considering the complex process of crafting anti terrorism measures

63 Documents the Government Doesn't Want You to Read Jesse Ventura, Dick Russell, 2012-04-02 A collection of government documents dating back to 1950 s

The Politics of Emerging Strategic Technologies Nayef R.F. Al-Rodhan, 2011-04-28 Examines key trends in emerging strategic technologies and the implications for geopolitics and human dignity Al Rodhan argues that future evolution into transhumans is inevitable In preparation the global community is urged to establish strict moral and legal guidelines balancing innovation with the guarantee of dignity for all

Black 9/11 Mark Gaffney, 2012-06-01 The weeks following the attacks of September 11 2001 were traumatic for nearly every American but for some the answers they received from the media and the government to explain the horrific events was not satisfactory Accusations of cover ups internal plots and sabotage from within the ranks of the U S government were and continue to be not uncommon But compelling evidence contrary to the accepted narrative has for some skeptics been lacking This investigation into the events of that day reveals dark secrets about United States sponsored terrorism Taking highly complex technical and scientific information and distilling it for the consumption of the lay person this inquiry attempts to reveal the truth behind that infamous day

The Criminal-Terror Nexus in Chechnya Jeff Meyers, 2017-04-12 The line between criminal and terrorist groups is often blurred and Chechen groups are an excellent example of this new phenomenon As the Soviet Union collapsed groups began to fill the cracks offering services that the state could not The Chechens were one group that outrivaled many groups and they soon became synonymous throughout the Russian Federation with criminal This work looks into the historical social and religious reasons behind the rise of militant Islam in the region From there it will discuss the historical difference between organized crime and terror how the two have coalesced into the crime terror nexus and how the Chechens compare to two other groups that have gone through the same evolution The Sicilian mafia and the militant Islamic Movement of Uzbekistan or IMU Though neither group are exactly the same there are links that can help the reader understand the domestic and foreign problems that twenty first century nation states deal with throughout the world

The Governance of Online Expression in a Networked World Helena Carrapico, Benjamin Farrand, 2017-10-02 In recent years we have witnessed the mushrooming of pro democracy and protest movements not only in the Arab world but also within Europe and the Americas Such movements have ranged from popular upheavals like in Tunisia and Egypt to the organization of large scale demonstrations against unpopular policies as in Spain Greece and Poland What connects these different events are not only their democratic aspirations but also their innovative forms of communication and organization through online means which are sometimes considered to be outside of the State s control At the same time however it has become more and more apparent that countries are attempting to increase their understanding of and control over their citizens actions in the digital sphere This

involves striving to develop surveillance instruments control mechanisms and processes engineered to dominate the digital public sphere which necessitates the assistance and support of private actors such as Internet intermediaries Examples include the growing use of Internet surveillance technology with which online data traffic is analysed and the extensive monitoring of social networks Despite increased media attention academic debate on the ambivalence of these technologies mechanisms and techniques remains relatively limited as is discussion of the involvement of corporate actors The purpose of this edited volume is to reflect on how Internet related technologies mechanisms and techniques may be used as a means to enable expression but also to restrict speech manipulate public debate and govern global populaces This book was published as a special issue of the Journal of Information Technology and Politics [Climate Politics And The Climate Movement In Australia](#) Verity Burgmann, Hans Baer, 2012-08-01 Climate change is the hottest topic of the twenty first century and the climate movement a significant global social movement This book examines the broad context of Australian climate politics and the place of the climate movement within it Acting from above are the most powerful forces corporations and governments both Labor and Coalition with the media framing the issues Climate movement actors in the middle include the Australian Greens major environmental and climate organisations think tanks academics public intellectuals and the union movement Acting from below are the numerous local climate action groups and various regional and national networks This lowest level is the primary location of the climate movement and grassroots mobilisation the source of its vitality To advocate a safe climate and climate justice the book ends by offering a vision for an alternative Australia based upon the principles of social equity and environmental sustainability
