November 2012 Memorandum Ett:

The Report: Mongolia 2014 Oxford Business Group, 2014-05-23 Since the country's transition from communism two decades ago the Mongolian economy has experienced rapid liberalisation. Sectors including ICT and insurance are expanding quickly and while the mining sector has been responsible for making Mongolia a rising star in the global economy there is great potential for further growth in all economic sectors. Politically stable and rich with natural resources Mongolia has emerged as a bellwether for investor confidence in recent years. The 2013 commercialisation of the Oyu Tolgoi gold and copper mine is helping to diversify Mongolia's mineral exports away from coal while the government is working to improve the investment environment by adopting the new Investment Law among other measures. Challenges do exist however from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems. In response the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness.

Empowered Educators in Canada Carol Campbell, Ken Zeichner, Ann Lieberman, Pamela Osmond-Johnson, 2017-03-13 BEST PRACTICES FROM CANADA'S HIGH PERFORMING SCHOOL SYSTEMS *Empowered Educators in Canada* is one volume in a series that explores how high performing educational systems from around the world achieve strong results. The anchor book *Empowered Educators: How High Performing Systems Shape Teaching Quality Around the World* is written by Linda Darling Hammond and colleagues with contributions from the authors of this volume. *Empowered Educators in Canada* details the core commonalities that exist across Canada with special emphasis on the localized nature of the systems, a hallmark of Canadian education. Canada boasts a highly educated population and the provinces/territories truly value education as evidenced by the significant proportion of public funds allocated to schooling. Operated by the provinces and territories, participation in kindergarten, primary and secondary education is close to 100% across the nation. In addition to offering traditional academics, secondary education includes opportunities for students to attend technical and vocational programs. To demonstrate exemplary education systems the authors examine two top performing jurisdictions, Alberta and Ontario, which have developed strong supports for teacher development. Canadian teachers are highly qualified and salary scales in all jurisdictions are typically based on a teacher's level of education and years of experience. While Canada has enjoyed much educational success, the education of First Nations students has historically been one of the country's more controversial and contentious issues. Overall, Canada is a country that is proud of its education system and places a high value on and participation in publicly funded education. *Asiakirjat* Finland.
