### 4.1 General Requirements

[See Process Flow Chart FC 4.1-1](#)

Alabama Specialty Products, Inc. has established, documented and implemented a Quality Management System (QMS) in accordance with the requirements of the ISO 9001:2008 Standard, it is not a stand-alone system, but is integrated within ASPI's operating discipline which encompasses the policies, requirements, and work processes of Environment, Health, Safety, Manufacturing, Human Resources and Quality.

Developed and endorsed by company management the QMS ensures that customers' receive quality, reliability and integrity in the products and services ASPI provides them and that customers' needs and requirements are met. The QMS calls for precise adherence to specifications, as well as legal and quality requirements.

Product quality is maintained through systems of standardization and process control. Service quality covers all aspects of customer transactions and is ensured by the function that is providing the service.

### 4.2 Documentation Requirements

#### 4.2.1 General

The QMS documentation includes:

- A documented Quality Policy and objectives
- A Quality Manual, (requirements for the quality manual are contained in section 4.2.2)
- Documented procedures required by ISO 9001:2008 (i.e., sections 4.2.3, 4.2.4, 8.2.2, 8.3, 8.5.2 and 8.5.3)
- Documents (information and its supporting medium) needed by the organization to ensure the effective planning, operation and control of its processes
- Records required by ISO 9001:2008, (stating results achieved or providing evidence of activities performed)

#### 4.2.2 Quality Manual

This Quality Manual has been prepared to describe Alabama Specialty Products, Inc. QMS. The scope and permissible exclusions of the QMS are described in section one of this manual. Each section of the manual references documented QMS procedures relating to the requirements outlined in that section. The [Process Flow Chart, FC 4.1-1](#), provides a description of the interaction between the processes of the QMS system.

#### 4.2.3 Control of Documents

All the QMS documents are controlled according to the [Document Control Procedure, QP 4.2-1](#).

#### 4.2.4 Control of Quality Records

Quality Records are maintained to provide evidence of conformity to requirements and the effective operation of the QMS. The records are maintained according to the [Control of Documents and Quality Records, QP 4.2-1](#).

**Hardware and Software** D.J. Smith,J.S. Edge,2012-12-06 How to Use This Book The primary purpose of this book is to assist small companies involved in both hardware and software to devise and evolve their own quality systems There are a number of national and now international standards which outline the activities for which procedures and records need to be specified They are described and compared in Chapter 2 and the subsequent guidance in the book is intended to assist in meeting them Although at first sight the operations of a hardware equipment developer may seem very different from those of a software house the basic requirements of a quality system such as the BS 5750 and ISO 1987 series of documents are the same For this reason the same standard can be called for in both areas and it will be seen in Part 2 that suitable procedures can be derived to meet both types of operation Quality standards BS 5750 AQAP ISO 9000 series distinguish between companies carrying out on the one hand both design and manufacturing fixed functions and on the other hand those

who only manufacture to specifications In practice the lesser requirements those applying to manufacture to fixed specifications are common to both levels of standard and the additional controls pertaining to design are added to obtain the higher standard Chapter 2 explains the differences in detail Malaria Microscopy Quality Assurance Manual World Health Organization,2009 Early diagnosis and prompt effective treatment is the basis for the management of malaria and key to reducing malaria mortality and morbidity An acceptable microscopy service is one that is cost effective provides results that are consistently accurate and timely enough to have a direct impact on treatment This requires a comprehensive and active quality assurance QA program This manual outlines a hierarchical structure based on retraining validation and the development of competency standards designed to ensure the quality of diagnosis necessary for a successful malaria program while remaining within the financial and personnel resources likely to be available The mode of implementation of the QA system outlined in this manual will vary according to the organization of the national laboratory services dealing with malaria which may fall under the national malaria control program or under a separate laboratory structure working closely with the malaria program Procedures in Phlebotomy - E-Book John C.
