Subcommittee on the Environment and the Atmosphere,1976 *Chemistry* Frank Brescia,1974 *Complex Adaptive Leadership* Nick Obolensky,2024-11-01 Since its publication Complex Adaptive Leadership has become a Gower bestseller that has been taught in corporate leadership programmes business schools and universities around the world to high acclaim In this updated paperback edition Nick Obolensky argues that leadership should not be something only exercised by nominated leaders It is a complex dynamic process involving all those engaged in a particular enterprise The theoretical background to this lies in complexity science and chaos theory spoken and written about in the context of leadership for the last 20 years but still little understood We all

seem intuitively to know leadership isn't what it used to be but we still cling to old assumptions which look anachronistic in changing and challenging times Nick Obolensky has practised, researched and taught leadership in the public, private and voluntary sectors. In this exciting book he brings together his knowledge of theory, his own experience and the results of 19 years of research involving 2,500 executives in 40 countries around the world. The main conclusion from that research is that the more complex things become, the less traditional directive leadership is needed. Those operating in the real world nonetheless need ways of coping. The book is focused on helping practitioners struggling to interpret and react to increasingly VUCA (Volatile, Uncertain, Complex, Ambiguous) times. The book will particularly appeal to practitioners wishing to improve their leadership effectiveness as well as for students and researchers in the field of leadership.

Disruptive Change and the Capital Markets Marius Fischer, 2023-04-03. The risk-based approach to capital markets regulation is in crisis. Climate change, shifting demographics, geopolitical conflicts and other environmental discontinuities threaten established business models and shorten the life spans of listed companies. The current rules for periodic disclosure in the EU fail to inform market participants adequately. Unlike risks, uncertainties are unquantifiable or may only be quantified at great cost, causing them to be insufficiently reflected in periodic reports. This is unfortunate given the pivotal role capital markets must play in the economy's adaptation to environmental discontinuities. It is only with a reformed framework for periodic disclosure that gradual and orderly adaptation to these discontinuities appears feasible. To ensure orderly market adaptation, a new reporting format is required; scenario analysis should be integrated into the European framework for periodic disclosure.
