Dimensions of Register Variation Douglas Biber, 1995-08-31

Douglas Biber's new book extends and refines the research and methodology reported in his ground-breaking *Variation Across Speech and Writing* (CUP, 1988). In *Dimensions of Register Variation* he gives a linguistic analysis of register in four widely differing languages: English, Nukulaelae, Tuvaluan, Korean and Somali. Using the multi-dimensional analytical framework employed in his earlier work, Biber carries out a principled comparison of both synchronic and diachronic patterns of variation across the four languages. Striking similarities as well as differences emerge, allowing Biber to predict for the first time cross-linguistic universals of register variation. This major new work will provide the foundation for the further investigation of cross-linguistic universals governing the pattern of discourse variation across registers and will be of wide interest to any scholar interested in style, register and literacy.
