Governance of Arctic Shipping

Robert C. Beckman, Tore Henriksen, Kristine Dalaker Kraabel, Erik J. Molenaar, J. Ashley Roach, 2017-08-21 *Governance of Arctic Shipping Balancing Rights and Interests of Arctic States and User States* examines potential cooperative mechanisms for balancing rights and interests of Arctic States and user States in light of experiences with Southeast Asian cooperative mechanisms. This volume analyzes the applicable international regulatory framework with special attention to the roles of the International Maritime Organization and the Arctic Council. The rights interests positions and practice of Arctic coastal States are compared with those of user States with particular emphasis on China Japan and South Korea. The final chapters analyze cooperative arrangements in Southeast Asia in order to explore if these could act as models to enhance cooperation among coastal States and user States in the Arctic.

The IMLI Treatise On Global Ocean Governance David Joseph Attard, Rosalie P Balkin, Donald W Greig, 2018-07-11 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance. However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. The volume examines how the IMO with 171 Member States and 3 Associated Members has and continues to promote the goals of safe secure sound and efficient shipping on clean oceans. It studies the interface and interaction between UNCLOS and IMO instruments and how IMOs safety security and environmental protection conventions have contributed to global ocean governance including the peaceful order of the polar regions.

Arctic Governance: Volume 1 Ida Folkestad Soltvedt, Svein Vigeland Rottem, 2017-10-03 The Polar North is known to be home to large gas and oil reserves and its position holds significant trading and military advantages yet the maritime boundaries of the region remain ill defined In the twenty first century the Arctic is undergoing profound change As the sea ice melts a result of accelerating climate change global governance has become vital In this first of three volumes the latest research and analysis from the Fridtjof Nansen Institute the world's leading Arctic research body is brought together Arctic Governance Law and Politics investigates the legal and political order of the Polar North focusing on governance structures and the Law of the Sea Are the current mechanisms at work effective Are the Arctic states interests really clashing or is the atmosphere of a more cooperative nature Skilfully delineating policy in the region and analysing the consequences of treaty agreements Arctic Governance's uncovering of a rather orderly Arctic race will become an indispensable contribution to contemporary

International Relations concerning the Polar North *The United Nations Convention on the Law of the Sea* Kristina Siig, Birgit Feldtmann, Fenella M.W. Billing, 2023-10-09 The 1982 United Nations Convention on the Law of the Sea UNCLOS has for four decades been considered by many to be one of the most important legislative achievements of international law. It is revered as a constitution of the oceans providing the legal framework for the governance of the oceans. This volume explores how the UNCLOS is functioning in various complex settings, how it adapts to new emerging developments as well as how it interacts with other regulation both within the law of the sea regime and outside. Engaging in themes such as law and order at sea, UNCLOS interaction with human rights and the role of private actors, the book raises complex questions in the application, understanding and enforcement of the convention and how it can be envisaged, interpreted and used in a dynamic world. The volume also raises methodological questions, the answers to which may enhance the predictability and coherence of the law under UNCLOS and thus secure its role as the predominant and relevant system for legal governance at sea for many decades to come. As a contribution to ensuring the future relevance of UNCLOS, the book will be a valuable resource for scholars, diplomats, judges and other practitioners who are working with and interpreting the law of the sea and related issues of maritime law, migration law, human rights law and humanitarian law. Governance of Arctic Shipping Aldo Chircop, Floris Goerlandt, Claudio Aporta, Ronald Pelot, 2020-08-11 This open access book is a result of the Dalhousie led research project Safe Navigation and Environment Protection supported by a grant from the Ocean Frontier Institute's the Canada First Research Excellent Fund CFREF. The book focuses on Arctic shipping and investigates how ocean change and anthropogenic impacts affect our understanding of risk, policy management and regulation for safe navigation, environment protection, conflict management between ocean uses and protection of Indigenous peoples' interests. A rapidly changing Arctic as a result of climate change and ice loss is rendering the North more accessible, providing new opportunities while producing impacts on the Arctic. The book explores ideas for enhanced governance of Arctic shipping through risk based planning, marine spatial planning and scaling up shipping standards for safety, environment protection and public health.

Arctic Shipping Frédéric Lasserre, Olivier Faury, 2019-09-05 This book considers both the present state of Arctic shipping and possible future trends with reference to the various sectors of maritime transportation: cruise, tourism, container traffic and bulk shipping. Ports are analysed as tools that support the strategies of coastal states to foster the development of resource extraction, enhance the attractiveness of Arctic shipping lanes and enable the control of maritime activities through coast guard deployment. The aim of this book is to draw a picture of the trends of Arctic shipping. How is traffic evolving in Canada's Arctic or along the Northern Sea Route? Are there significant differences between bulk and container shipping segments when considering the Arctic market? How are the ports and the hinterland developing and what are the strategies behind those? How is the legal framework shaping the

evolution of maritime transportation The contributors to this book consider all of these questions and more as they map out the prospects for Arctic shipping and analyse in detail the development of Arctic shipping as a result of multi variable interactions This book will be key reading for industry professionals and post graduate students alike **Shipping in Inuit**
