**Abstract**  
 The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health of sedentary middle-aged men. The subjects were 20 men, aged 40-50 years, who were sedentary and had no history of cardiovascular disease. They were divided into two groups: a control group and an exercise group. The exercise group performed a 12-week training program consisting of aerobic and resistance training. The control group did not exercise. Physical fitness was measured by maximum heart rate, maximum oxygen consumption, and maximum power output. Health was measured by blood pressure, cholesterol, and body weight. The results showed that the exercise group had significantly higher maximum heart rate, maximum oxygen consumption, and maximum power output than the control group. The exercise group also had significantly lower blood pressure, cholesterol, and body weight than the control group. These results suggest that a 12-week training program can improve physical fitness and health in sedentary middle-aged men.

*God's Exercise Manual* Keith Lopez Organic Fitness, 2007-12-18 *God's Exercise Manual* is a book created to provide an understanding of health. It teaches a simple method to maintain a healthy body weight. In a time when all food is fast and all movement is minimal, this book is a necessity. Health is not an option; it is a desired state among all living creatures. I created this book after 10 years of saturating myself in the world of health and fitness. This book was written to deliver powerful and effective theories on exercise. Simple and gradual changes in the way you move. This is not a temporary change; your life is this. This is a permanent change of your life. This diet is created by God because he created all the movements in the program.
