Big Idea: Coordinate Geometry

You can use coordinates of the center of a circle and its radius to write an equation of a circle.

Performance Task 3

A gardener wants the three rosebushes in her garden to be watered by a rotating water sprinkler. The gardener draws a diagram of the garden using a grid in which each unit represents 1 ft. The rosebushes are at $(1,3)$, $(5,11)$, and $(11,4)$. She wants to position the sprinkler at a point equidistant from each rosebush. Where should the gardener place the sprinkler? Show your work. What equation described the boundary of the circular region that the sprinkler will cover?

the motivational aspect of this experience Flow motivates people to carry out certain activities repeatedly seeking a challenge in the act and looking to improve their skills and abilities In this book this motivational aspect will be imbedded in and related to other theories of intrinsic motivation and empirical work on flow and performance The book provides a review of the current flow research with a focus on rigorous analysis on methodology The author takes the time to present methodological aspects in flow research to qualify empirical work In addition this volume presents neuropsychological considerations and empirical correlates of flow experiences The work also describes various theoretical integrations of the different paths being taken within the field of flow research It presents what has been learned since the beginning of flow research what is still open and how the mission to understand and foster flow experience research should continue
