Handbook of Children, Media and Culture Kirsten Drotner, Sonia Livingstone, 2008-02-19 This essential volume brings together the work of internationally renowned researchers each experts in their field in order to capture the diversity of children and young people s media cultures around the world Why are the media such a crucial part of children s daily lives Are they becoming more important more influential and in what ways Or does a historical perspective reveal how past media have long framed children s cultural horizons or perhaps how families however constituted have long shaped the ways children relate to media In addressing such questions the contributors present detailed empirical cases to uncover how

children weave together diverse forms and technologies to create a rich symbolic tapestry which in turn shapes their social relationships. At the same time many concerns even public panics arise regarding children's engagement with media leading the contributors also to inquire into the risky or problematic aspects of today's highly mediated world. Deliberately selected to represent as many parts of the globe as possible and with a commitment to recognizing both the similarities and differences in children and young people's lives from China to Denmark from Canada to India from Japan to Iceland from the authors offer a rich contextualization of children's engagement with their particular media and communication environment while also pursuing cross cutting themes in terms of comparative and global trends. Each chapter provides a clear orientation for new readers to the main debates and core issues addressed combined with a depth of analysis and argumentation to stimulate the thinking of advanced students and established scholars. Since children and young people are a focus of study across different disciplines the volume is thoroughly multi disciplinary. Yet since children and young people are all too easily neglected by these same disciplines this volume hopes to accord their interests and concerns they surely merit.

The Parent App Lynn Schofield Clark, 2013. New technologies offer new ways for families to connect, access ideas and entertainment and manage the risks faced by children and teens but they also bring more responsibilities, choices and challenges. Clark argues that families experience digital and mobile technologies in their children's lives especially during the preteen and teen years quite differently depending on whether they are middle class or less advantaged. Based on over ten years of interviews hundreds of parents and children The Parent App explores these differences and provides the kind of guidance backed by thorough research that parents today desperately need.

Lurking Joanne McNeil, 2020-02-25. One of Esquire's Best Books to Elevate Your Reading List in 2020 and a OneZero Best Tech Book of 2020. Named one of the 100 Notable books of 2020 by the End of the World Review. A concise but wide ranging personal history of the internet from for the first time the point of view of the user. In a shockingly short amount of time the internet has bound people around the world together and torn us apart and changed not just the way we communicate but who we are and who we can be. It has created a new unprecedented cultural space that we are all a part of even if we don't participate that is how we participate but by which we're continually surprised, betrayed, enriched, befuddled. We have churned through platforms and technologies and in turn been churned by them. And yet the internet is us and always has been. In Lurking Joanne McNeil digs deep and identifies the primary if sometimes contradictory concerns of people online: searching, safety, privacy, identity, community, anonymity and visibility. She charts what it is that brought people online and what keeps us here even as the social equations of digital life what we're made to trade knowingly or otherwise for the benefits of the internet have shifted radically beneath us. It is a story we are accustomed to hearing as tales of entrepreneurs and visionaries and dynamic and powerful corporations but there is a more profound intimate story that hasn't yet been told. Long one of the most incisive ferociously intelligent and widely respected cultural critics online McNeil here establishes a singular vision of who we are now, tells the
