HIV/AIDS and the South African State Dr Annamarie Bindenagel Šehović, 2014-04-28 For three decades post apartheid the HIV AIDS epidemic from first acknowledgement to its management as a chronic disease demanded unparalleled attention This was nowhere more evident than in South Africa This book explores how the state responded to its responsibilities to defend and protect human security Linking this to the role of the state as sovereign protector and provider of security it applies the findings to the broader re interpretation of sovereign responsibility in the 21st Century This book does not seek to absolve the South African state of its responsibility to respond Moreover it argues that although the state the government before during and after the transition to democracy was aware of and acknowledged the threat political economic and social posed by the epidemic it nonetheless chose not to make the epidemic a priority policy issue As a result it argues that the South African HIV AIDS case illustrates the tension inherent between a state's ultimate sovereign responsibility to respond and its tactical dependence on external contributors to meet the demands of all of its constituents
