His principal aim is rather to stimulate readers to think about the big questions in cognitive aging research and how they might best be answered An Assessment Guide To Geriatric Neuropsychology Holly Tuokko,Thomas

beginning of the introductory chapter I have always been convinced of the paramount significance of the topic of giftedness and gifted education to the world as a whole. There is no doubt that gifted individuals were and will be extremely important to society. One way to understand the history of human civilization is via inventions and discoveries of the gifted. All human cultural development builds on the amazing technological, scientific, educational and moral achievements of the human mind. Today people increasingly realize that gifted and talented individuals are even more important than in the past.
