#### Performance Task 2

A construction crew wants to hoist a heavy beam so that it is standing up straight. They tie a rope to the beam, secure the base, and pull the rope through a pulley to raise one end of the beam from the ground. When the beam makes an angle of  $40^\circ$  with the ground, the top of the beam is 8 ft above the ground.

The construction site has some telephone wires crossing it. The workers are concerned that the beam may hit the wires. When the beam makes an angle of  $60^\circ$  with the ground, the wires are 2 ft above the top of the beam. Will the beam clear the wires on its way to standing up straight? Explain.
