Leaving Johnny Behind Anthony Pedriana,2010-10-16 In the tradition of *Why Johnny Can't Read* written by Rudolph Flesch in the 1950s *Leaving Johnny Behind* provides a comprehensive examination of the barriers that deny children adequate literacy training This book describes the obstacles faced by a school principal from Milwaukee's central city when he attempted to implement research based reading practices Upon further examination he discovered that the reading establishment generally rejects the product of legitimate science choosing instead to engage in a never ending interfusion of the latest innovations modifications and gimmicks This condition Anthony Pedriana observes has a disparate impact on poor and minorities those who suffer from dyslexia and other forms of reading disability and those for whom English is a second language But unlike Flesch who stressed the differences between phonics and holistic practices Pedriana seeks common ground among reading practitioners He notes that there is plenty in the data for both sides to love and that failing to take advantage of that convergence is to mock our high minded expressions of children first

Using Mentor Texts to Develop the Writer's Craft Mary McMackin, Jennifer M. Bogard, 2015-01-01 Students must study what accomplished authors have written and practice the styles approaches or methods they employ in order to become proficient writers The practical standards based book dives deeply into the genres of poetry narrative fiction narrative nonfiction informative explanatory and opinion argument Using close reading of mentor texts analysis of specific writing strategies in those texts and the application of those strategies in the student's own writing students will be equipped for any type of writing The Teaching Brain Vanessa Rodriguez, Michelle Fitzpatrick, 2011-05-10 A significant contribution to understanding the interaction among teachers students the environment and the content of learning Herbert Kohl education advocate and author What is at work in the mind of a five year old explaining the game of tag to a new friend What is going on in the head of a thirty five year old parent showing a first grader how to button a coat And what exactly is happening in the brain of a sixty five year old professor discussing statistics with a room full of graduate students While research about the nature and science of learning abounds shockingly few insights into how and why humans teach have emerged until now Countering the dated yet widely held presumption that teaching is simply the transfer of knowledge from one person to another The Teaching Brain weaves together scientific research and real life examples to show that teaching is a dynamic interaction and an evolutionary cognitive skill that develops from birth to adulthood With engaging accessible prose Harvard researcher Vanessa Rodriguez reveals what it actually takes to become an expert teacher At a time when all sides of the teaching debate tirelessly seek to define good teaching or even how to build a better teacher The Teaching Brain upends the misguided premises for how we measure the success of teachers A thoughtful analysis of current educational paradigms Rodriguez's case for altering pedagogy to match the fluctuating dynamic forces in the classroom is both convincing and steeped in common sense Publishers Weekly The 3 Habits of Highly Successful Reading Teachers Megan Milani, What distinguishes successful reading classrooms from those where struggling readers are left behind The 3 Habits of Successful Reading Teachers starts with the premise that every student even those who struggle the most can learn to read It guides teachers in providing daily practice with high frequency words letter sounds and word solving strategies and includes
