Increasing Economic Opportunity for African Americans United States. Congress. Joint Economic Committee,2014

The Sport and Prey of Capitalists Linda McQuaig,2019-08-31 Why are we selling off the impressive public enterprises we often battled as a nation to create In the early 1900s thousands of Canadians battled wealthy interests winning control of Niagara Falls and creating a public power company Another popular movement succeeded in creating Canada's public broadcasting system to counter American dominance of the airwaves And a Canadian doctor established a publicly owned laboratory that saved countless lives by producing affordable medications contributing to medical breakthroughs and helping to eradicate smallpox throughout the world But in recent decades we have allowed our inspiring public enterprises to be privatized and our vital public programs downsized leaving us increasingly dominated by the forces of private greed that rule the marketplace In *The Sport and Prey of Capitalists* Linda McQuaig challenges the dogma of privatization which has defined our political era She argues that now more than ever as we grapple with climate change and income inequality we need to expand not shrink our public sphere

Financial Capability and Asset

Building in Vulnerable Households Margaret Sherraden, Julie Birkenmaier, J. Michael Collins, 2018-03-28 Financial struggles of American families are headline news In communities across the nation families feel the pinch of stagnant and sometimes declining incomes Many have not recovered from the Great Recession when millions lost their homes and retirement savings They are bombarded daily with vexing financial decisions Which bills to pay Where to cash checks How to cover an emergency How to improve a credit report How to bank online How to save for the future Low and moderate income families have few places to turn for guidance on financial matters Not many can afford to pay a financial advisor to help navigate an increasingly complex financial world They do their best with advice from family and trusted individuals Social workers financial counselors and human services professionals can help As first responders they assist families and help in finding financial support from public and private sources But these professionals are too often unprepared to address the full range of financial troubles of ordinary working families Financial Capability and Asset Building in Vulnerable Households prepares social workers financial counselors and other human service professionals for financial practice with vulnerable families Building on more than 20 years of research the book sets the stage with key concepts historical antecedents and current financial challenges of families in America It provides knowledge and tools to assist families in pressing financial circumstances and offers a lifespan perspective of financial capability and environmental influences on financial behaviors and actions Furthermore the text details practice principles and skills for direct interventions as well as for designing financial services and policy innovations It is an essential resource for preparing the next generation of practitioners who can enable families to achieve economic security and development

Politics, Policy, and Public Options Ganesh Sitaraman, Anne Alstott, 2021-07-01 A public option is a government provided social good that exists alongside a similar privately provided good While the public option is typically identified with health care policy public options have been a longstanding feature of American life in a variety of sectors ranging from libraries to swimming pools Public schools for example coexist alongside private schools However there is surprisingly little research on public options as a general category Rather over the last few decades considerable scholarly and popular efforts to ensure access to important social goods have focused on market subsidies like vouchers or privatization which both face increasing criticism Uniting scholars from across disciplines this volume delves into the theory of the public option explores several important case studies and shows how public options could be a corrective to the trend toward privatization and subsidies This title is also available as Open Access on Cambridge Core

[The Public Option](#) Ganesh Sitaraman, Anne L. Alstott, 2019-07-01 A solution to inequalities wherever we look in health care secure retirement education is as close as the public library Or the post office community pool or local elementary school Public options reasonably priced government provided services that coexist with private options are all around us ready to increase opportunity expand freedom and reawaken civic engagement if we will only let them Whenever you go to your local public library send mail via the post office or visit Yosemite you are taking

advantage of a longstanding American tradition the public option Some of the most useful and beloved institutions in American life are public options yet they are seldom celebrated as such These government supported opportunities coexist peaceably alongside private options ensuring equal access and expanding opportunity for all Ganesh Sitaraman and Anne Alstott challenge decades of received wisdom about the proper role of government and consider the vast improvements that could come from the expansion of public options Far from illustrating the impossibility of effective government services as their critics claim public options hold the potential to transform American civic life offering a wealth of solutions to seemingly intractable problems from housing shortages to the escalating cost of health care Imagine a low cost high quality public option for child care Or an extension of the excellent Thrift Savings Plan for federal employees to all Americans Or every person having access to an account at the Federal Reserve Bank with no fees and no minimums From broadband internet to higher education The Public Option reveals smart new ways to meet pressing public needs while spurring healthy competition More effective than vouchers or tax credits public options could offer us all fairer choices and greater security
