Open and Distance Education in Asia, Africa and the Middle East Olaf Zawacki-Richter, Adnan Qayyum, 2019-02-18
This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series following *Open and Distance Education in Australia, Europe and the Americas* (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online open and distance education, this book will prove particularly valuable for policy makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

Self-Directed Learning in the era of the COVID-19 pandemic Josef de Beer, Neal Petersen, Elsa Mentz, Robert J. Balfour, 2023-03-01
The book is devoted to scholarship in the field of pre-service teacher education with a specific focus on research into the enhancement of self-directed learning and contributes to the discourse on creating a disposition towards self-directed learning during the social and academic integration of first-year students within higher education institutions. Two chapters also deal with research on the development of self-directed learning and nuanced understandings of the chosen professions of Law and Health Sciences students. The target audience is scholars working in the fields of teacher education, self-directed learning, engaging pedagogies, problem-based learning, cooperative learning and gamification. Whereas social constructivist learning theory served as an overarching theoretical framework for the virtual excursions, the various chapters in the book also draw on other secondary theories such as self-determination theory, social interdependence theory, gender theory and the 'with fitness' model of Kounin (1970).
