

Poverty

Position Paper

Over the past thirty years, the rate of extreme poverty has been reduced threefold and the populations' living conditions have improved significantly in most of the world's regions. However persistent areas of widespread poverty remain and there are enormous differences in inequality and poverty levels between countries.

Dianova believes that it is essential to consider the extent of inequality across the world we all share. We also believe that all human beings, in every country, "have the right to life, liberty and personal safety". We believe that this principle is the most important one we uphold.

That is why we believe that improving the living conditions of the world's poorest people should be an ongoing concern of wealthy countries. Unfortunately, this is not the case today, as indifference to the plight of developing countries shows. We believe that our role as civil society stakeholders is to support the economic, democratic and social development of countries. We also believe we need to influence our governments to do the same.

Developing countries desperately need more attention. We also believe there is an urgent need help the growing number of people in socially vulnerable situations linked to growing inequality.

Dianova finds such poverty and exclusion unjust, and unworthy of societies that have the means to address these problems. Moreover, we believe that providing support to vulnerable people to facilitate their inclusion could bring significant social, economic and public safety benefits.

This is why, for both ethical and practical reasons, we support efforts to find and implement solutions aimed at promoting the inclusion of those experiencing extreme social vulnerability and effectively combating the causes of poverty and exclusion. This is a fundamental objective for achieving a peaceful society.

The Economic Analysis of Substance Use and Abuse Frank J. Chaloupka, Michael Grossman, Warren K. Bickel, Henry Saffer, 2009-02-15. Conventional wisdom once held that the demand for addictive substances like cigarettes, alcohol, and drugs was unlike that for any other economic good and therefore unresponsive to traditional market forces. Recently, however, researchers from two disparate fields, economics and behavioral psychology, have found that increases in the overall price of an addictive substance can significantly reduce both the number of users and the amounts those users consume. Changes in the full price of addictive substances, including monetary value, time outlay, effort to obtain, and potential penalties for illegal use, yield marked variations in behavioral outcomes and demand. *The Economic Analysis of Substance Use and Abuse* brings these distinctive fields of study together and presents for the first time an integrated assessment of their data and results. Unique and innovative, this multidisciplinary volume will serve as an important resource in the current debates concerning alcohol and drug use and abuse and the impacts of legalizing illicit drugs.

Perspectives on Economic Development and Policy in India K.L. Krishna, Vishwanath Pandit, K. Sundaram, Pami Dua, 2016-12-05. The book pays tribute to the celebrated economist Professor Suresh Tendulkar's contribution and scholarship to economics, economic policy making, and economic reforms in India. Professor Tendulkar served on numerous panels and commissions set up to reform diverse aspects of India's economy. To name a few, he served as the Chairperson of the Prime Minister's Economic Advisory Council, Chairman of the National Commission of Statistics, National Sample Survey Organisation, Committee on National Accounts, and as a member in the Fifth Pay Commission, the Disinvestment Commission, 1996. He is credited with devising the new method to estimate poverty in India, which resulted in India's poverty estimates being scaled up. This book primarily focuses on Professor Tendulkar's contributions on economic planning in India, the political economy of economic reforms, and his important conceptual and policy-relevant work on poverty measurement. The three sub-themes of the book—Economic Reforms and Policy Formulation, Poverty and Inequality, and Development and Trade—are indicative of his specific research interests, namely poverty and well-being in India and the world economy. It covers both micro and macro aspects relevant to the Indian economy. The econometric techniques utilized encompass state-of-the-art microeconomic as well as macroeconomic models. The book contains contributions from eminent economists associated with Professor Tendulkar and is useful for readers from the undergraduate through the Ph.D.
