Baking Technology and Nutrition Stanley P. Cauvain,Rosie H. Clark,2019-09-10 A new study of the challenges presented by manufacturing bakery products in a health conscious world The impact of bakery products upon human nutrition is an increasingly pressing concern among consumers and manufacturers alike With obesity and other diet related conditions on the rise the levels of salt fat and sugar found in many baked goods can no longer be overlooked Those working in the baking industry are consequently turning more and more to science and technology to provide routes toward healthier alternatives to classic cake bread and pastry recipes With Baking Technology and Nutrition renowned food scientist Stanley P Cauvain and co author Rosie H Clark present an innovative and much needed study of the changes taking place in the world of baking Their discussion focuses on the new avenues open to bakers looking to improve the nutritional value of their products and encompasses all related issues from consumer preferences to the effects of nutritional enhancement upon shelf life Featuring an abundance of new research and insights into the possible future of modern baking this unique text Offers practical guidance on developing delivering and promoting high nutrition bakery products Discusses reducing ingredients such as salt fat and sugar for improved nutrition while preserving quality and consumer acceptability Explores how wheat based products can be ideal vehicles for improving the nutrition of major sectors of populations Suggests real world solutions to problems rising from poorly defined quality guidelines and inadequate dialogue between bakers and nutritionists Baking Technology and Nutrition is an indispensable and timely resourcefor technologists manufacturers healthcare practitioners or anyone else working in today s food and nutrition industries The Technology of Cake Making A.J. Bent,E.B.

Bennion,G.S.T. Bamford,2013-03-09 The popularity of the 1973 fifth edition of The Technology of Cake Making has continued in many of the English speaking countries throughout the world This sixth edition has been comprehensively revised and brought up to date with new chapters on Cream butter and milkfat products Lactose Yeast aeration Emulsions and emulsifiers Water activity and Reduced sugar Eggs and egg products Baking fats and lower fat goods The chapters on Sugars Chemical aeration Nuts in confectionery Chocolate Pastries Nutritional value and Packaging have been completely rewritten

The increased need for the continuous development of new products does not of necessity mean that new technology has to be constantly introduced Many of the good old favourites may continue to be produced for many years and they form suitable bench marks for new product development The sixth edition introduces the use of relative density to replace specific volume as a measure of the amount of aeration in a cake batter the use of relative density is in line with international agreement Specific volume is kept as a measurement of baked product volume since the industry is comfortable with the concept that subject to an upper limit an increase in specific volume coincides with improvement in cake quality **Manley's**
