Level 2

In order to gain a better insight into the effects of smartphones on the attention span in classrooms, semi-structured interviews were conducted with 50 high school students.

Participant Selection. Participants were selected based on their age, gender, and level of smartphone usage to acquire a representative sample of the population.

Level 3

Sample Characteristics

The 50 selected participants were aged between 14 and 18, with an approximately equal number from each grade. There were 22 male and 28 female participants.
