Gollnick,2019-01-02 An ideal introductory text for aspiring teachers Introduction to Teaching Making a Difference in Student Learning is grounded in the realities and complexities found in today s schools Acclaimed authors Gene E Hall Linda F Quinn and Donna M Gollnick thoroughly prepare students to make a difference as teachers presenting firsthand stories and evidence based practices while offering a student centered approach to learning The authors focus on how to address one of the biggest challenges facing many of today s schools ensuring that all students are learning and help teachers prioritize student learning as their primary focus From true to life challenges that future teachers will face such as high stakes testing reduced funding low retention and Common Core State Standards to the inspiration and joy they will experience throughout their teaching careers the Third Edition paints an importantly authentic picture of the real life of a teacher This title is accompanied by a complete teaching and learning package     *Supervision: A Redefinition* Thomas Sergiovanni,Robert Starratt,2013-03-22 The ninth edition of Supervision A Redefinition is a research based guide to the practice of supervision that aims to clarify the major challenges teachers and supervisors face within the policy context focus on essential foundational understandings that feed the integrity of teaching and supervision and explore the complexities of the practice of supervision and teaching which supervisors must deal with The 9th edition re defines supervision once again in light of the complex demands being placed on principals and central office administrators while continuing to emphasize the book s original theme of human perspectives     Christian Weekly ,1905     Community Education for Social Justice Cameron White,2014-02-05 What is community How important is community in the 21st century Where might the idea of community fit in education and schooling teaching and learning These are the questions and themes embedded in this book The general critique is that community is an add on in our schools and often is dismissed as a result of the individualistic and competitive nature of schooling today Our focus is to provide critical investigations as to the possibility of community and that we need community now more than ever The concept of community education brings many ideas and issues to mind Related themes include place based field based environmental service learning and outdoor education Each has its own more narrow focus with community education perhaps an umbrella term than encompasses them all Nevertheless the suggestion here is that instead of community education serving as an extension or add on to traditional approaches it should be the focus of all education What is often missing in teaching and learning are contexts and connections than make education

meaningful Community education engages participants in problem and issues based approaches to the local community thereby facilitating that local to global link Instead of compartmentalized subjects integrated approaches use what students and the community know or understand to develop further questions solutions or even problems Community education offers efficacy in that it provides opportunities for collaboration in addressing local issues and problems It enables the community to become the classroom thus ensuring a more long term connection to active rather than passive endeavors as citizens
