

NetScreen-5XP

Getting Started

Use the instructions in this Getting Started guide to help you connect and configure your NetScreen-5XP. For more configuration examples and details, see the *NetScreen-5XP User's Guide* and the *NetScreen Concepts & Examples ScreenOS Reference Guide*.

The numbers on the diagram are paired with the steps below.

CONNECTING THE DEVICE

Using the instructions below, connect the NetScreen-5XP and prepare to configure the device to protect your network. Use the LEDs on the front panel of the device to help you determine the device status.

Step 1

Connect an Ethernet cable from the Untrust part of the NetScreen-5XP to the external router, cable modem, or DSL modem.

Step 2

- If the workstation is in a LAN (see diagram), connect a cross-over cable from the Trust port to the internal switch or hub.
- If the workstation is a single workstation, connect an Ethernet cable from the Trust port directly to the Ethernet port on the workstation.

Step 3

Connect the power cable between the NetScreen-5XP and a power source. NetScreen recommends using a surge protector.

- a. Ensure that the Power LED glows green. This indicates the device is receiving power.
- b. After the NetScreen-5XP starts (should take about 30 seconds), ensure that the Status LED blinks green. This indicates the device is operating normally.

- c. Ensure that the Link Status LEDs glow green for the connected interfaces. This indicates the device has network connectivity.

Step 4

Configure the workstation to access the NetScreen-5XP via a Web browser.

- a. Ensure that your workstation is properly connected to your LAN (see the diagram above).
- b. Change the TCP/IP settings of your workstation to obtain its IP address automatically from the NetScreen-5XP via DHCP. For help, see the operating system documentation for your workstation.

Note: Ensure that your internal network does not already have a DHCP server.

- c. If necessary, restart your workstation to enable the changes to take effect.
