Smart Robots V. Hunt, 2013-03-07 Here is one of the first really thorough presentations on smart robots Robots machine vision systems sensors manipulators expert systems and artificial intelligence concepts combined in state of the art computer integrated manufacturing systems These smart robots increase productivity and improve the quality of our products This comprehensive volume which is extensively illustrated provides a unique synthesis and overview of the emerging field of smart robots the basic approaches for each of the constituents systems the techniques used applications the descriptions of current hardware or software projects a review of the state of the art of the technology current research and development efforts and trends in the development of smart robots All of the information has been compiled from a wide variety of knowledgeable sources and recent government reports An extensive selection of photographs diagrams and charts amplify this book The contents of major chapters include Introduction to smart robots Artificial intelligence for smart robots Smart robot systems Sensor controlled robots Machine vision systems Robot manipulators Natural language processing Expert systems and Computer integrated manufacturing Smart Robots presents the state of the art in intelligent robots It is designed to help the reader develop an understanding of industrial applications of smart robots as well as the new technological developments Smart Robots is an outstanding introduction to the integration and application of machine vision

systems sensors expert systems and artificial intelligence technology **GPU Solutions to Multi-scale Problems in Science and Engineering** David A. Yuen, Long Wang, Xuebin Chi, Lennart Johnsson, Wei Ge, Yaolin Shi, 2013-01-09 This book covers the new topic of GPU computing with many applications involved taken from diverse fields such as networking seismology fluid mechanics nano materials data mining earthquakes mantle convection visualization It will show the public why GPU computing is important and easy to use It will offer a reason why GPU computing is useful and how to implement codes in an everyday situation *Advanced Nanofibrous Materials Manufacture Technology based on Electrospinning* Yanbo Liu, Ce Wang, 2019-04-23 This book comprehensively addresses advanced nanofiber manufacturing based on electrospinning technology The principles relationships between process parameters and structure morphology and performance of electrospun nanofibers and nanomaterials and the methods for enhanced field intensity and uniform distribution are discussed The electric field intensity and distribution during electrospinning is also analyzed based on finite element analysis on both the needle and the needleless electrospinning Furthermore the modification techniques for improved nanomaterials strength are covered aiming to provide effective avenues towards the manufacture of stronger nanofiber or nanomaterial products *Oswaal Objective General English | Quantitative Aptitude | Verbal And Non-Verbal Reasoning | Logical Reasoning | Chapter Wise | Topic Wise | Set Of 4 Books | For All Latest Competitive Exams* Oswaal Editorial Board, 2024-09-09 Benefits of the product 1 Crisp Revision Concepts Review Mind Maps offer bite sized and just in time revision tools 2 Extensive Practice with 700 Previous Years questions based on 3 difficulty levels 3 Valuable Exam Insights Exam wise weightage analysis of questions 4 Concept Clarity Easy to Grasp theory complemented by Solved examples 5 100% Exam Readiness with fully solved previous years questions of different competitive examinations 6 Learning Objectives Outlines what aspirant should understand or be able to achieve after the course 7 Expert Tips Helps you get expert knowledge to master the Logical Reasoning in your first attempt *Lignocellulosic Biorefining Technologies* Avinash P. Ingle, Anuj Kumar Chandel, Silvio Silverio da Silva, 2020-01-10 A text to the advances and development of novel technologies in the production of high value products from economically viable raw materials Lignocellulosic Biorefining Technologies is an essential guide to the most recent advances and developments of novel technologies in the production of various high value products from economically viable raw materials Written by a team of experts on the topic the book covers important topics specifically on production of economical and sustainable products such as various biofuels organic acids enzymes biopigments biosurfactants etc The book highlights the important aspects of lignocellulosic biorefining including structure function and chemical composition of the plant cell wall and reviews the details about the various components present in the lignocellulosic biomass and their characterizations The authors explore the various approaches available for processing lignocellulosic biomass into second generation sugars and focus on the possibilities of utilization of lignocellulosic feedstocks for the production of biofuels and biochemicals Each chapter includes a range of clear informative tables and

figures and contains relevant references of published articles This important text Provides cutting edge information on the recent developments in lignocellulose biorefinery Reviews production of various economically important and sustainable products such as biofuels organic acids biopigments and biosurfactants Highlights several broad ranging areas of recent advances in the utilization of a variety of lignocellulosic feedstocks Provides a valuable authoritative reference for anyone interested in the topic Written for post graduate students and researchers in disciplines such as biotechnology bioengineering forestry agriculture and chemical industry Lignocellulosic Biorefining Technologies is an authoritative and updated guide to the knowledge about various biorefining technologies

The Cube of Strategic Management Mihai V. Putz, 2019-10-16 The Cube of Strategic Management The Distinctive Advantage of Organizations is a trans disciplinary book that introduces the author s new business model of the geometrization of management The author advocates that strategic management has to shift to include a science and technology perspective to not only support business administration but also to make this scientific perspective an inherent part of management strategy building The book spans the fundamental and the theoretical aspects and advances this new management model in response to the current and future 21st century synergic interconnection needs in addressing management and marketing post modern strategies The book is a quintessence of the historical theories of the various 8th fold ideas of management Taylor Drucker Peters Waterman Covey and applies them in an innovative new way The author uses the cube and its 8 corners for the first time to represent 8 forms of the strategic management way of business in that the 8 corners of a cube represent the competitive advantage of any organization

Visual Event Detection Niels Haering, Niels da Vitoria Lobo, 2013-04-17 Traditionally scientific fields have defined boundaries and scientists work on research problems within those boundaries However from time to time those boundaries get shifted or blurred to evolve new fields For instance the original goal of computer vision was to understand a single image of a scene by identifying objects their structure and spatial arrangements This has been referred to as image understanding Recently computer vision has gradually been making the transition away from understanding single images to analyzing image sequences or video understanding Video understanding deals with understanding of video sequences e g recognition of gestures activities facial expressions etc The main shift in the classic paradigm has been from the recognition of static objects in the scene to motion based recognition of actions and events Video understanding has overlapping research problems with other fields therefore blurring the fixed boundaries Computer graphics image processing and video databases have obvious overlap with computer vision The main goal of computer graphics is to generate and animate realistic looking images and videos Researchers in computer graphics are increasingly employing techniques from computer vision to generate the synthetic imagery A good example of this is image based rendering and modeling techniques in which geometry appearance and lighting is derived from real images using computer

vision techniques Here the shift is from synthesis to analysis followed by synthesis Biochemistry Terry Brown,2016-09-22 Biochemistry is a major new textbook designed and created specifically for briefer courses in the subject Written by Prof Terry Brown of the University of Manchester author of Genomes and Gene Cloning the book provides the necessary detail and rigour expected for these courses but without the extraneous material found in the larger textbooks With an increasing number of students taking a short course in biochemistry there is a growing need for a book that covers the subject concisely and succinctly Biochemistry has been designed from the outset for these shorter courses it is not a cut down version of one of the larger books that dominate the market Although it is shorter there is no compromise in content style and coverage The book is attractively designed in full colour throughout with all the pedagogical features expected in a major textbook It covers what students should be expected to know and is written in the clear and accurate writing style for which Terry Brown is widely lauded With its competitive price and resources for adopting lecturers all of the illustrations and diagrams from the book and answers to the end of chapter questions Biochemistry will become the textbook of choice for any brief biochemistry course Confirmed Adoptions Biochemistry is already the required text at the following institutions Becker College USA Bishop Burton College UK Bournemouth University UK Charles R Drew University of Medicine and Science USA Charleston Southern University USA Colorado State University Pueblo USA Idaho State University USA Liverpool John Moores University UK Montclair State University USA Newcastle University UK Rivier University USA Southeast Missouri State University USA Staffordshire University UK Stephen F Austin State University USA Texas Christian University USA The University of Texas at Austin USA Ume University Sweden University of Aberdeen UK University of Bradford UK University of Bedfordshire UK University of Brighton UK University of the Incarnate Word USA University of Kansas USA University of Miami Miller School of Medicine USA University of Nottingham UK University of Roehampton UK University of Salford UK University of the West of England UK University of Tulsa USA Valley City State University USA Yale University School of Medicine USA Nature-Inspired Computing Nazmul H. Siddique,Hojjat Adeli,2017-05-19 Nature Inspired Computing Physics and Chemistry Based Algorithms provides a comprehensive introduction to the methodologies and algorithms in nature inspired computing with an emphasis on applications to real life engineering problems The research interest for Nature inspired Computing has grown considerably exploring different phenomena observed in nature and basic principles of physics chemistry and biology The discipline has reached a mature stage and the field has been well established This endeavour is another attempt at investigation into various computational schemes inspired from nature which are presented in this book with the development of a suitable framework and industrial applications Designed for senior undergraduates postgraduates research students and professionals the book is written at a comprehensible level for students who have some basic knowledge of calculus and differential equations and some exposure to optimization theory Due to the focus on search and optimization the book is also appropriate for electrical control civil industrial and manufacturing engineering business

and economics students as well as those in computer and information sciences With the mathematical and programming references and applications in each chapter the book is self contained and can also serve as a reference for researchers and scientists in the fields of system science natural computing and optimization *Strategic Planning Decisions in the High Tech Industry* Dilek Cetindamar,Tugrul Daim,Berna Beyhan,Nuri Basoglu,2013-02-05 The scale and complexity of research and practices of open innovation mandate a correspondingly sophisticated form of decision making Strategic Planning Decisions brings together a number of tools that ease the decision process in technology companies providing both conceptual frameworks and practical applications Innovative approaches are presented such as an ontology based model where all the relevant aspects of a potential technology are interrelated to provide a comprehensive and logically connected data pool for decision makers Divided into two sections Strategic Planning Decisions describe both strategic approaches using the decision tools and tactical approaches Some of these tools are expanded while some others are embedded in a model that will lay the ground for practical application These include bibliometric analysis ontology roadmapping lead user six sigma and multi actor multi objective decision making methods Recent research and relevant theory are balanced with up to date practical applications and hands on techniques making Strategic Planning Decisions ideal for engineers who wish to keep up to date with current ideas in the field of TM It also provides workable methods for practising managers from all levels who wish to apply a more rigorous approach in their work and consultants concerned with technology assessment and its management **ECGBL2015-9th European Conference on Games Based Learning** Robin Munkvold and Line Kolås,2015-09-18 These proceedings represent the work of researchers participating in the 9th European Conference on Games Based Learning which is being hosted this year by Nord Trondelag University College Steinkjer Norway on the 8 9 October 2015 The Conference has become a key platform for individuals to present their research findings display their work in progress and discuss conceptual advances in many different areas and specialties within Games Based Learning It also offers the opportunity for like minded individuals to meet discuss and share knowledge ECGBL continues to evolve and develop and the wide range of papers and topics will ensure an interesting two day conference In addition to the main streams of the conference there are mini tracks focusing on the areas of the design of multiplayer collaborative serious games applied Games and gamification the teacher s role in game based learning games for STEM Science Technology Engineering Mathematics learning assessment of digital game based learning and pervasive and ubiquitous gaming for learning In addition to the presentations of research we are delighted to host the third year of the Serious Game competition which provides an opportunity for educational game designers and creators to participate in the conference and demonstrate their game design and development skills in an international competition This competition is again sponsored by SEGAN Serious Games Network With an initial submission of more than 60 games 28 finalists will present their games at the conference Prizes will be awarded to the games judged to demonstrate the best quality and originality of game play itself and

the positioning and articulation of the game's contribution to the educational domain. With an initial submission of 190 abstracts, after the double-blind peer review process, there are 75 research papers, 15 PhD research papers, 4 Non-Academic papers, and 8 work-in-progress papers published in these Conference Proceedings. These papers represent research from more than 40 countries, including Australia, Austria, Belgium, Brazil, Bulgaria, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Ireland, Israel, Italy, Japan, Malaysia, Norway, Portugal, Russia, Saudi Arabia, Slovakia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, ROC, The Netherlands, The Netherlands, United Arab Emirates, UK, and USA.

Computational Modelling of Concrete Structures Günther Meschke, Bernhard Pichler, Jan Rots, 2018-01-31. The EURO C conference series Split 1984, Zell am See 1990, Innsbruck 1994, Badgastein 1998, St. Johann im Pongau 2003, Mayrhofen 2006, Schladming 2010, St. Anton am Arlberg 2014, and Bad Hofgastein 2018 brings together researchers and practising engineers concerned with theoretical, algorithmic, and validation aspects associated with computational simulations of concrete and concrete structures. *Computational Modelling of Concrete Structures* reviews and discusses research advancements and the applicability and robustness of methods and models for reliable analysis of complex concrete reinforced concrete and pre-stressed concrete structures in engineering practice. The contributions cover both computational mechanics and computational modelling aspects of the analysis and design of concrete and concrete structures. Multi-scale cement and concrete research, experiments, and modelling; Aging concrete from very early ages to decades-long durability; Advances in material modelling of plain concrete; Analysis of reinforced concrete structures; Steel-concrete interaction; fibre reinforced concrete and masonry; Dynamic behaviour from seismic retrofit to impact simulation. *Computational Modelling of Concrete Structures* is of special interest to academics and researchers in computational concrete mechanics, as well as industry experts in complex nonlinear simulations of concrete structures.
