

## **OBJECTIVES OF RESEARCH**

Research is defined as a systematised effort to gain new knowledge. It is referred to as the search for knowledge.

The main purpose of research is to find solutions to unsolved problems using scientific procedures and to understand various phenomenon scientifically.

The main objective of research is to find out a hidden, undiscovered truth.

The various objectives are –

1. Propose and test certain hypothesis that provide causal relationships between variables.
2. Discover and establish the existence of relationship, association and independence between two or more aspects of a situation or phenomenon.
3. Understand different phenomenon and develop new perceptions about it.
4. Study and describe accurately the characteristics of situations, problems, phenomenon, services, groups or individuals.
5. Explain the unexplored horizons of knowledge.
6. Test reported findings and conclusions on new data and novel conclusions on previously reported data.
7. Study the frequency of research that is connected with unspecified study.

**Nursing—4th Year (2012-1999)** I. Clement, 2012      *Writing Human Factors Research Papers* Don Harris, 2016-12-05 Writing high quality papers suitable for publication within international scientific journals is now an essential skill for all

early career researchers their career progression and the reputation of the department in which they work depends upon it. However many manuscripts are rejected or sent back for major reworking not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented. It is one thing to write a good scientific paper however it is quite another thing to get it published. This requires some additional nous. In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor. By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't. The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error. The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers. The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful. All major points are illustrated with examples from his own published works. The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section. However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees' comments. Each chapter concludes with a checklist to ensure all the key elements have been addressed. **Research Paper**

,1965 Writing and Publishing Science Research Papers in English Karen Englander,2013-10-11 This book provides a comprehensive review of the current knowledge on writing and publishing scientific research papers and the social contexts. It deals with both English and non Anglophone science writers and presents a global perspective and an international focus. The book collects and synthesizes research from a range of disciplines including applied linguistics the sociology of science sociolinguistics bibliometrics composition studies and science education. This multidisciplinary approach helps the reader gain a solid understanding of the subject. Divided into three parts the book considers the context of scientific papers the text itself and the people involved. It explains how the typical sections of scientific papers are structured. Standard English scientific writing style is also compared with science papers written in other languages. The book discusses the strengths and challenges faced by people with different degrees of science writing expertise and the role of journal editors and reviewers.

**Nutrition Research** Drummond,Alison Murphy-Reyes,2017-02-10 Nutrition Research Concepts Applications is written for nutrition students in undergraduate and graduate programs who are beginning to develop the skills necessary to become knowledgeable research consumers conduct and document research projects and understand how to use research findings in practice. The first text of its kind to clearly explain each section of a research paper to students who are new at the process this title outlines how to read and analyze research by learning concepts such as sampling design or relative risk and then seeing these abstract ideas brought to life in actual research articles. Students also apply these concepts in Application Questions and Critical Thinking Exercises in which they write abstracts answer questions about evidenced based study data.

or use a checklist to critique a study Students also learn the nuts and bolts of searching databases for appropriate articles using systematic reviews such as the Academy of Nutrition and Dietetics      *The Essentials of Effective Written Communication for Young Researchers and Tertiary Students* Laura Cheng Sue Sen B.comn,2022-05-16 The scientific article must be written in a scientific format and may seem confusing for tertiary students and young researchers especially for the beginning science writer due to its rigid structure which is so different from writing humanities One of the reasons for using this format is that it is a means of efficiently communicating scientific findings to a broad community of scientists in a uniform manner Writing a technical article or research paper is a challenging endeavour for students and young researchers Publishing your first technical article or research paper requires observation of some essential guidelines Hence the purpose of this book is to provide basic guidelines to tertiary students and young researchers using this user friendly format to help in writing a scientific article This book focuses on the essential steps for the publication of a technical article and research paper for tertiary students and young researchers      **Research Methodology** Vinayak Bairagi,Mousami V. planning themselves are insufficient for this purpose An estimation of the reserves in the Swiss Plateau shows that there is a theoretical capacity for accommodating around 0.5 million additional inhabitants there is without having to adjust the formal instruments Around two thirds of all reserves are located in small and medium sized municipalities with fewer than 10 000 inhabitants which moreover make up 93% of all administrative units of the Swiss Plateau In addition it is estimated that half of the floor area reserves lie on already built up though underused plots In the main settlement area of Switzerland a systematic density eschewal is taking place in small and medium sized municipalities In order to help inward development achieve a breakthrough in the main settlement area in Switzerland informal procedures are needed in these municipal categories that result in a revision of local planning In doing so informal procedures should not negate the specific organisational form of small and medium sized municipalities namely the militia system of governance but should rather adapt to this principle An inward development compass brings together the knowledge existing in the militia system of governance forming the informal prelude to the local planning revision of the third generation in small and medium sized municipalities The inception of the revised spatial planning law and its stipulations on inward development and densification confronts the three large scale areas of Switzerland with different challenges Yet driven by changes in the fields of demographics energy and finances the initial problems will manifest themselves most clearly in the Swiss Plateau If the required transformation process is to succeed a more pronounced orientation of policy and spatial planning towards the initial problems in small and medium sized municipalities is necessary
