Parallel Curriculum Units for Social Studies, Grades 6-12 Jeanne H. Purcell, Jann H. Leppien, 2009-10-29 There is a freshness to Purcell and Leppien's approach transforming the curriculum into a platform for active investigation of our rapidly changing world. Your learners become 21st century social scientists as they engage in probing timely issues and problems. Heidi Hayes Jacobs, Curriculum Expert and Author, President Curriculum Designers Inc. Design Parallel Curriculum units for in-depth learning in social studies. The Parallel Curriculum Model (PCM) as described in the best-selling book *The Parallel Curriculum* is a framework for developing a dynamic curriculum that helps students acquire expertise in specific subject areas. This resource deepens teachers' understanding of how to use the PCM to provide rigorous learning opportunities for students in social studies. In *Parallel Curriculum Units for Social Studies Grades 6-12*, experienced teachers contribute sample social studies units that demonstrate what high-quality curriculum looks like within a PCM framework. Covering history, geography, sociology, and interdisciplinary studies, these field-tested units each contain Teacher explanations of the unit design, Connections to concepts, skills, and standards, Step-by-step directions for delivering the lessons and units, Modification strategies, and methods for assessment. Use these examples to design your own units and enhance your ability to provide challenging curriculum tailored to the abilities, interests, and learning preferences of each learner. **Middle Years**, 1994. From a former Christian Scientist, the first unvarnished account of one of America's most controversial and little-understood religious movements. Millions of Americans from Lady Astor to Ginger Rogers to Watergate conspirator H. R. Haldeman have been touched by the Church of Christ Scientist. Founded by Mary Baker Eddy in 1879, Christian Science was based on a belief that intense contemplation of the perfection of God can heal all ills, an extreme expression of the American faith in self-reliance. In this unflinching investigation, Caroline Fraser herself raised in a Scientist household shows how the Church transformed itself from a small eccentric sect into a politically powerful and socially respectable religion and explores the human cost of Christian Science's remarkable rise. Fraser examines the strange life and psychology of Mary Baker Eddy, who lived in dread of a kind of witchcraft she called Malicious Animal Magnetism. She takes us into the closed world of Eddy's followers who refuse to acknowledge the existence of illness and death and reject modern medicine even at the cost of their children's lives. She reveals just how Christian Science managed to gain extraordinary legal and Congressional sanction for its dubious practices and tracks its enormous influence on new-age beliefs and other modern healing cults. A passionate
