Martin, 2018-02-26 This selection of essays by Luther Martin brings together studies from throughout his career both early as well as more recent in the various areas of Graeco Roman religions including mystery cults Judaism Christianity and Gnosticism It is hoped that these studies which represent spatial communal and cognitive approaches to the study of ancient religions might be of interest to those concerned with the structures and dynamics of religions past in general as well as to scholars who might with more recent historical research confirm evaluate extend or refute the hypotheses offered here for that is the way scholars work and by which scholarship proceeds **Telling Stories Differently** Janet Condy, 2015-09-01 The aim of this book is to share a relatively loose collection of studies using digital storytelling as a pedagogical tool in Cape Peninsula University of Technology CPUT The book takes an informed social justice approach to teaching and learning at the heart of which is the exploration of DST as a practice of voice and agency Voice and agency are

important in excavating and recovering subjugated identities and moving the concerns of those occupying subaltern spaces to the mainstream of teaching and learning Yet this discursive shift is not without inherent challenges Multi modal technologies are reflective of wider inequities in the so called technological divide Whilst this is a book about higher education there are important lessons for schooling On the one hand the book is a powerful demonstration of the potential of DST for enhancing learning in schools particularly in schools serving the poor and marginalised On the other hand improving teaching and learning in higher education through the creative use of technology is essential to overcome the learning challenges of those entering tertiary level institutions

Weird Olga Khazan, 2020-04-07 Learn why the concept of weird is being reclaimed and turned into a badge of honor used to show how being different culturally socially physically or mentally can be a person's greatest strength Most of us have at some point in our lives felt like an outsider sometimes considering ourselves too weird to fit in Growing up as a Russian immigrant in West Texas Olga Khazan always felt there was something different about her This feeling has permeated her life and as she embarked on a science writing career she realized there were psychological connections between this feeling of being an outsider and both her struggles and successes later in life She decided to reach out to other people who were unique in their environments to see if they had experienced similar feelings of alienation and if so to learn how they overcame them *Weird* is based on in person interviews with many of these individuals such as a woman who is professionally surrounded by men a liberal in a conservative area and a Muslim in a predominantly Christian town In addition it provides actionable insights based on interviews with dozens of experts and a review of hundreds of scientific studies *Weird* explores why it is that we crave conformity how that affects people who are different and what they can do about it First the book dives into the history of social norms and why some people hew to them more strictly than others Next Khazan explores the causes behind and the consequences of social rejection She then reveals the hidden upsides to being weird as well as the strategies that people who are different might use in order to achieve success in a society that values normalcy Finally the book follows the trajectories of unique individuals who either decided to be among others just like them to stay weird or to dwell somewhere in between Combining Khazan's own story with those of others and with fascinating takeaways from cutting edge psychology research *Weird* reveals how successful individuals learned to embrace their weirdness using it to their advantage

Mathematics Matters in Education Yeping Li, W. James Lewis, James J. Madden, 2017-10-03 This book is inspired by Roger E Howe's contributions to the international communities of mathematics and mathematics education Renowned for his research contributions in the fields of representation theory automorphic forms harmonic analysis and invariant theory Dr Howe has also fundamentally deepened our understanding of the mathematics taught in the early school grades and has challenged and stimulated mathematicians and mathematics educators to work together to examine this part of the mathematical universe more critically and in imaginative new ways This volume will help summarize and highlight Howe's contributions to several topic areas in

mathematics education demonstrating the possibility and importance of engaging mathematicians in high impact research in mathematics education and showcasing the importance of cross disciplinary collaboration and exchange *Human Survivability Studies* Shūichi Kawai,Masakazu Fujita,Eiko Kawai,2018 The challenges we face today are growing conspicuously broad in scale and complex in nature Human Survivability Studies is a new transdisciplinary field born from the growing awareness of the urgent need to tackle the large scale environmental and social issues at crisis point in the world today Based at Kyoto University the recently established Graduate School of Advanced Integrated Studies in Human Survivability is seeking to develop leaders able to challenge global problems on a number of fronts Each of the twenty chapters in this volume written by academics from the Graduate School looks at critical issues facing humanity from a different perspective discussing new ideas and scientific methods that will form the basis of human survivability The aim here is to outline the framework behind the ideas methodology and practice of this new scientific paradigm that incorporates knowledge from both the social and natural sciences Subject Environmental Studies Comparative Studies Natural Sciences Social Sciences *Teaching and Learning STEM* Richard M. Felder,Rebecca Brent,2016-02-22 Rethink traditional teaching methods to improve student learning and retention in STEM Educational research has repeatedly shown that compared to traditional teacher centered instruction certain learner centered methods lead to improved learning outcomes greater development of critical high level skills and increased retention in science technology engineering and mathematics STEM disciplines Teaching and Learning STEM presents a trove of practical research based strategies for designing and teaching STEM courses at the university community college and high school levels The book draws on the authors extensive backgrounds and decades of experience in STEM education and faculty development Its engaging and well illustrated descriptions will equip you to implement the strategies in your courses and to deal effectively with problems including student resistance that might occur in the implementation The book will help you Plan and conduct class sessions in which students are actively engaged no matter how large the class is Make good use of technology in face to face online and hybrid courses and flipped classrooms Assess how well students are acquiring the knowledge skills and conceptual understanding the course is designed to teach Help students develop expert problem solving skills and skills in communication creative thinking critical thinking high performance teamwork and self directed learning Meet the learning needs of STEM students with a broad diversity of attributes and backgrounds The strategies presented in Teaching and Learning STEM don t require revolutionary time intensive changes in your teaching but rather a gradual integration of traditional and new methods The result will be continual improvement in your teaching and your students learning More information about Teaching and Learning STEM can be found at <http://educationdesignsinc.com> book including its preface foreword table of contents first chapter a reading guide and reviews in 10 prominent STEM education journals *Academic Publishing* David Coniam,Peter Falvey,2022-10-02 This book focuses on the topic of academic publishing It discusses the mounting serious problems that

researchers particularly new researchers encounter when trying to publish their research The book addresses the issues of publishing as well as the salient factors militating against academic publication and the mitigating factors encouraging academic publication It provides potential solutions suggestions and strategies for overcoming some of these problems Growing research output from Southeast Asia including Singapore Malaysia Taiwan and China reveals the struggles that many authors have to confront when attempting to publish their work in reputable journals In both South Africa and other parts of Africa academic researchers are beginning to show strong evidence of credible academic output These researchers all need valid outlets for their work and the security that authentic peer review brings to the reviewing process In the fields of education social sciences and professional practices e g architecture and law recent years have seen the emergence of new outlets for practitioners research outputs in areas such as one's own practice self reflection and narrative inquiry These outlets are discussed in this book The book also discusses the malign influence of predatory publications in detail This book will be beneficial to university academics postgraduate students Ph D supervisors and new researchers

Promoting Law Student and Lawyer Well-Being in Australia and Beyond Rachel Field, James Duffy, Colin James, 2016-04-14 University can be a psychologically distressing place for students Empirical studies in Australia and the USA highlight that a large number of law students suffer from psychological distress when compared to students from other disciplines and members of the general population This book explores the significant role that legal education can play in the promotion of mental health and well being in law students and consequently in the profession The volume considers the ways in which the problems of psychological distress amongst law students are connected to the way law and legal culture are taught and articulates curricula and extra curricula strategies for promoting wellbeing for law students With contributions from legal academics

legal practitioners and psychologists the authors discuss the possible causes of psychological distress in the legal community and potential interventions that may increase psychological well being This important book will be of interest to legal academics law students members of the legal profession post graduate researchers as well as non law researchers interested in this area **Knowledge and Networking** Anton Oleinik,2014-05-31 Success and career growth in academic life depend upon reaching and influencing the widest audience possible To do so scientists strive to develop personalized trust They do so by establishing a large number of connections through networking and also through the strength of their arguments and the validity and reliability of their research To secure increasingly rare tenure positions and achieve salary increases promotions and recognition scholars place themselves on a continuum of priorities ranging from total emphasis on networking to complete focus on advancing knowledge trying to find some middle ground between the two extremes Anton Oleinik argues that when scholars prioritize networking science reproduces features of a small world in which personal connections prevail Who knows whom matters more than who knows what In this scenario one s status derives more from affiliation with a specific group of scholars or a particular university than from contributing to advancing knowledge Acknowledging that it would be a mistake to consider networking the main source of evils in science Oleinik instead criticizes the decisions scholars make while struggling to find that middle ground between networking and advancing knowledge and managing conflicts between these priorities The fierce competition for increasingly scarce research funds and the difficulty of finding jobs in academia underlines the growing importance of the choices made by an academic Though Oleinik focuses particularly on the social sciences his ideas are just as relevant to other disciplinary areas Managing People in Commercial Kitchens Charalampos Giousmpasoglou,Evangelia Marinakou,Anastasios Zopiatis,John Cooper,2022-01-17

Managing People in Commercial Kitchens A Contemporary Approach uses original research to argue that senior managers head chefs should differentiate their people management practices in kitchen brigades from those used in the hospitality industry more generally induction socialisation and performance evaluation due to the group s strong occupational identity and culture The understanding of chefs work from a management perspective is critical for successful hospitality operations but has been historically under researched Chapters provide a detailed account of chefs work in commercial kitchens from an HRM perspective Using occupational identity and culture as a vehicle this book explores the different aspects of managerial work in commercial kitchen settings general management leadership education and training skills and competencies managing deviant behaviour managing stress and managing diversity focused on gender segregation The final chapter looks at future perspectives on this unique working environment and the many challenges arising from the latest developments such as the COVID 19 pandemic Providing both theoretical insights and practical applications with the use of case studies throughout this will be of great interest to upper level students and researchers in hospitality as well as a useful reference for current managers in the field **Digital Transformations of Illicit Drug Markets** Meropi Tzanetakis,Nigel
