

Dear Graduating Class of _____,

What a remarkable year it has been! Just like that, 10 months have come and gone and your elementary school career is finished. It has been a pleasure teaching such hardworking and compassionate students. You have all persevered through the challenges that you faced in math, reading, and writing with grace and made many memories along the way. Your last year in elementary school also meant being a role model for the younger students in the building. I am so proud of the shining examples that this fifth grade class has set for those younger students who are going to eventually follow in your footsteps.

Now, it is time for the next chapter in your life to begin. I hope you all look back on these past six years in elementary school as a wonderful time where you created friendships that will last for years to come and began to really learn about who you are as an individual. Next year in sixth grade might feel like you're starting over, and you might face some tough days, weeks, and months, but just know, you are more than ready. Remember, as Michael Jordan once said, "If you run into a wall, don't turn around and give up. Figure out how to climb it, go through it, or work around it." It might take some hard work and endurance on your end, but I know you will make it through any challenge that comes your way.

Middle school is the stepping stone to some of the best years of your life. I urge you to pause every once in a while, look around you, and take everything in - your friends, the places, the memories that you're making. I hope you dare to try something new and accept new challenges. Most importantly, I hope you choose to stand apart from the crowd and stand up for what you believe in your heart to be right. I wish you all the best life has to offer. Congratulations on graduating!

Love,

The Shape of Social Inequality David Bills, 2005-08-24 This volume brings together former students colleagues and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller s many contributions to theory and research on social stratification and mobility All of the chapters respond to Haller s programmatic agenda for stratification research A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary second that we identify the individual and collective consequences of the different states and rates of change of such structures and third seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change The contributors to this Festschrift address such topics as the changing nature of stratification regimes the enduring significance of class analysis the stratifying dimensions of race ethnicity and gender and the interplay between educational systems and labor market outcomes Many of the chapters adopt an explicitly cross societal comparative perspective on processes and consequences of social stratification The volume offers both conceptually and empirically important new analyses of the shape of social stratification

Community Practice David A. foundations of community and social work practice *Unearthing Culturally Responsive Mathematics Teaching* Emily P. Bonner, 2010-11-04 *Unearthing Culturally Responsive Mathematics Teaching* The Legacy of Gloria Jean Merriex focuses on the theory and practices of a highly successful mathematics teacher of African American children in a high poverty school. The book aims to contribute to the limited literature base in this area in mathematics education. The discussions in the book center on the ideals of culturally responsive teaching CRT and seek to build understanding of this concept in the context of mathematics. Further the story of Gloria Jean Merriex speaks to the importance of historical influences on teaching practice. Her story is couched in sociopolitical realities of the American educational system and is discussed as such. Cultural incongruities that exist in classrooms and contribute to the black white achievement gap particularly in mathematics are also discussed.

Inquiry as Stance Marilyn Cochran-Smith, Susan L. Lytle, 2015-04-25 In this long awaited sequel to *Inside/Outside: Teacher Research and Knowledge*, two leaders in the field of practitioner research offer a radically different view of the relationship of knowledge and practice and of the role of practitioners in educational change. In their new book, the authors put forward the notion of inquiry as stance as a challenge to the current arrangements and outcomes of schools and other educational contexts. They call for practitioner researchers in local settings across the United States and around the world to ally their work with others as part of larger social and intellectual movements for social change and social justice. Part I is a set of five essays that conceptualize inquiry as a stance and as a transformative theory of action that repositions the collective intellectual capacity of practitioners. Part II is a set of eight chapters written by eight differently positioned practitioners who are or were engaged in practitioner research in K-12 schools or teacher education. Part III offers a unique format for exploring inquiry as stance in the next generation: a readers theatre script that juxtaposes and co-mingles 20 practitioners' voices in a performance oriented format. Together the three parts of the book point to rich possibilities for practitioner inquiry in the next generation. Contributors: Rebecca Akin, Gerald Campano, Delvin Dinkins, Kelly A.
