

TOEFL Independent Writing Sample

Whether or not there is a correlation between success and luck is an interesting question, and some might argue that the luck of being in the right place at the right time is integral to success. However, my feeling is that there is no correlation between the two, but rather, the correlation lies between success and hard work.

First of all, a good education that sets a person on a strong career path is a key success factor. Securing that university place and getting that education typically requires pre-requisite tests that can only be passed by serious studying, careful preparation, and significant investment. It is doubtful that luck would be of much help since very few people graduate without studying hard.

Secondly, indolent people who lack knowledge rarely have successful careers. Of course, there are many stories of people being promoted through a company's ranks, but without proper training and hard work, their incompetence shows through, and the time when they are asked to resign invariably catches up with them. For instance, not long after starting his small company, my friend had to declare bankruptcy, close his business, and admit defeat. Unfortunately for him, he just did not have the strategic vision or business experience to make his company successful. After studying at university and working for another company, he started a new company. This time, he succeeded and today is a successful businessman.

In sum, as long as success is thought of as the ability to turn dreams into reality, hard work is a given because it takes money. In order to earn that money, a college education that leads to a professional salary is necessary. All of these things are simply not possible without hard work. Overall, my feeling is that luck has no place in such a scheme of events.
