draws on Kant and Heidegger to help us understand living in an age of mass extinction caused by climate change They discuss what sorts of actions count as ecological starting a revolution going to the garden center to smell the plants And finally they explore a variety of current styles of being ecological a range of overlapping orientations rather than preformatted self labeling Caught up in the us versus them or you versus everything else urgency of ecological crisis Morton suggests it s easy to forget that you are a symbiotic being entangled with other symbiotic beings Isn t that being ecological
