You Can Publish Your Journal Article Gilbert C.

Gee, 2023-12-13 You've completed your research and want to publish it in a peer-reviewed journal. Author Gilbert C. Gee is here to help sharing what he learned as a writer, reviewer, and Editor in Chief and calling on other journal editors to offer their advice. *You Can Publish Your Journal Article* will not only help you write your paper but more importantly be more likely to succeed in peer review. The book has four main premises: that writing involves a relationship between you and your readers and that your research joins an ongoing conversation in the field; that good writing is rewriting and revision is critical; that people who write daily are more productive than those who binge write; and finally that persistency wins so don't give up when you get a rejection. With chapters offering practical advice on selecting the right journal, peer review, the methods section, displaying your data, writing the results and discussion sections, the book concludes with short essays from invited journal editors about how to avoid common mistakes and ensure success.

Rules for Writers with Writing about Literature (Tabbed Version) Diana Hacker, Nancy Sommers, 2012-01-16 When it comes to value, Rules rules. Rules for Writers is a college writer's companion that covers writing, grammar, research, and documentation in an extremely affordable and portable spiral-bound format. From the best-selling family of handbooks, Rules has consistently been the best value for college writers. Now it's even more so. The Seventh Edition actually teaches students how to make better use of their handbook. With new material about how to integrate the handbook into lessons and class activities, Rules for Writers is an even more useful tool for instructors. We like Rules because it's affordable, easy to use, and flexible enough for multiple courses. Anne Helms, Alamance Community College.

Writing for Earth Scientists Stephen K. Donovan, 2017-05-08

The time has come. You are an Earth scientist. You've spent weeks, months, years working on this project; now is the time to pull it together for publication. You might be writing an undergraduate or graduate thesis, a research paper for a leading journal, a note for the newsletter of the local amateur scientific society, a book review, or an abstract for a specialist geological conference. How do you make the transition from promising unpublished researcher to established academic author? different approach You have to decide what it is you are going to write and where to publish it There are co authors supervisors of your degree peer reviewers and editors to deal with on the way But the only way to write like an academic is to write like an academic where do you start You could do much worse than start here There are many books on how to write and be published aimed at research students and other aspiring academics Many of these are readable comprehensive and provide good advice This book is composed of numerous short chapters on this subject all directly relevant to one or more aspects of academic publishing and aimed particularly at the Earth scientists in the broadest sense Geologists will be encouraged to use the book as much as a reference as a reader dipping in to the chapters that contain relevant tips hints and comments to enable them to improve the paper that they are currently writing The book is intended to be informative readable and above all of practical application for all readers In summary the volume will be a readable compilation investigating many facets of academic publishing relevant to the Earth sciences It will be of particular interest to postgraduate students postdocs and new academics
