

# operating your side-by-side refrigerator

## USING THE CONTROL PANEL (CONT'D)

### Cubed Ice , Crushed Ice

Enjoy cubed or crushed ice by selecting your preference from the digital control panel. The ice type light indicates the type of ice that is currently chosen.

### Ice Off

This icon will light up when you activate the Ice Off function. In this case, the ice will not be produced.

If the refrigerator's water supply line is not connected and water is not being supplied to the refrigerator, the refrigerator will make unusual noises if the ice maker is on or if you push the water dispenser lever. To stop the noises, press the Ice Type button until the Ice Off icon lights up (at least 3 seconds) indicating that the ice maker is off.

If the water line is connected, and your refrigerator is making unusual noises, see if the water supply valve on the line connected to your refrigerator is closed, preventing water from flowing into the refrigerator. If the valve is closed, open the valve.

### Canceling cooling off mode (Freezer/Fridge Temperature Indicator moving)

Cooling off function is for store display, and it makes the refrigerator not to generate cool air.

In case of Cooling off Mode, refrigerator may seem like working but it does not make cool air. To cancel this mode, press the Lighting button and the Freezer button at the same time for 5 seconds until "Ding-dong" sounds.

### Using the water dispenser

Press the Water button on the control panel. Place your cup on the water outlet and push against the dispenser pad until hearing the "click" sounds. Make sure the glass is in line with the dispenser to prevent the water from splashing out.

To get colder water

- The dispensed water is cool, not icy cold
- When you want colder water with ice, dispense ice to your glass first before filling it with water to prevent water from splashing out.

### Using the ice dispenser

Press the Ice Type button to select the type of ice you want. Place your cup under the ice outlet and push gently against the dispenser pad. Make sure the glass is in line with the dispenser to prevent the ice from bouncing out. When cubed ice is selected after using the crushed ice, a small amount of residual crushed ice might be produced.
