Porcelain New Ceramics:

Porcelain Vivienne Foley, 2018-10-23 For thousands of years the special properties of porcelain its delicacy translucency and remarkable strength have fascinated and inspired and these qualities continue to have an enduring appeal for ceramic artists However porcelain is also a notoriously demanding medium that presents unique challenges for the maker In this inspiring practical guide porcelain artist Vivienne Foley introduces ceramicists to the material she has been working with for more than forty years The book takes a comprehensive look at all aspects of porcelain and covers everything from its composition and workability to decorating and glazing Methods of throwing and building are thoroughly covered with a focus on techniques and faults specific to porcelain Drying and firing is also discussed and there is a useful troubleshooting section on all the most likely problems and faults along with suggested remedies Beginning with the fascinating history of making in porcelain from the Imperial kilns of China to the Meissen factory of Germany and beyond this book offers an insight into the way porcelain has been used in the past and how it has been adapted and developed for contemporary work by current artists who are constantly looking to push the boundaries of possibility Illustrated throughout with helpful how to images as well as the beautiful works of current artists Porcelain is the essential handbook for any ceramic student or artist seeking to understand and work with this extraordinary material Breaking the Mould Rob Barnard, Natasha Daintry, Clare

Twomey, 2007 The international ceramics scene is enjoying the highest profile it has had for many years Breaking the Mould looks at ceramic artists working within this versatile medium Drawing on the rich history of pottery these artists are pushing the techniques objectives and perceptions of the medium into new exciting territory The book profiles the work of over 70 ceramicists including Suzanne King Simon Fell Grayson Perry Barnaby Barford Carina Ciscato and Amy Houghton Their work ranges from interpretations of utilitarian pots to abstract sculpture and a revisioning of kitch porcelain ornaments all of which are brought to life in beautiful colour reproductions Essays by prolific makers and academics look at the history and inspirations behind the medium today Following in the footsteps of New Directions in Jewellery Fashioning Fabrics and The Cutting Edge of Wallpaper Breaking the Mould is a definitive overview of a craft scene that is simultaneously building upon and breaking with its roots and in doing so creating a brave new future for itself **New Ceramics** Eileen

Porcelain Analysis and Its Role in the Forensic Attribution of Ceramic

Specimens Howell G. M. Edwards, 2021-11-09 The material for this book arose from the author's research into porcelains over many years as a collector in appreciation of their artistic beauty as an analytical chemist in the scientific interrogation of their body paste enamel pigments and glaze compositions and as a ceramic historian in the assessment of their manufactory foundations and their correlation with available documentation relating to their recipes and formulations A discussion of the role of analysis in the framework of a holistic assessment of artworks and specifically the composition of porcelain namely hard paste soft paste phosphatic bone china and magnesian is followed by its growth from its beginnings in China to its

importation into Europe in the 16th Century A survey of European porcelain manufactories in the 17th and 18th Centuries is followed by a description of the raw materials minerals and recipes for porcelain manufacture and details of the chemistry of the high temperature firing processes involved therein The historical backgrounds to several important European factories are considered highlighting the imperfections in the written record that have been perpetuated through the ages The analytical chemical information derived from the interrogation of specimens from fragments shards or perfect finished items is reviewed and operational protocols established for the identification of a factory output from the data presented Several case studies are examined in detail across several porcelain manufactories to indicate the role adopted by modern analytical science with information provided at the quantitative elemental oxide and qualitative molecular spectroscopic levels where applicable The attribution of a specimen to a particular factory is either supported thereby or in some cases a potential reassessment of an earlier attribution is indicated Overall the information provided by analytical chemical data is seen to be extremely useful for porcelain identification and for its potential attribution in the context of a holistic forensic evaluation of hitherto unknown porcelain exemplars of questionable factory origins
