Dear Representative:

As a lymphoma advocate with the Lymphoma Research Foundation and as your constituent, I support efforts to ensure that all cancer patients have access to cancer care of high quality. Expert reports have identified critical elements of a high quality cancer care system. At the core of such a system is the coordination of active treatment with symptom management. Patients who receive this kind of care experience the appropriate management of the symptoms of cancer and its treatment at the same time they are getting the best possible therapy for their disease.

Cancer treatment is often a very difficult experience, but steps can be taken to be sure that the side effects of treatment are well managed. We are fortunate that Representatives Lois Capps (D-CA) and Tom Davis (R-VA) have introduced legislation that takes important steps toward reforming the cancer care system. The Capps-Davis bill would authorize Medicare payment for services to plan and summarize cancer care and would also establish pilot programs of coordinated care and systems for training cancer care specialists in coordinating cancer care.

I urge you to lend your support to the Comprehensive Cancer Care Improvement Act, H.R. 5465. This bill represents a critical first step toward a better system of cancer care, and your support of this measure is important to me and other cancer survivors.

Thank you in advance for considering this bill. I look forward to hearing that you will support the Comprehensive Cancer Care Improvement Act.

Sincerely,

*Research Methods in Health Promotion* Laura F. Salazar, Richard Crosby, Ralph J. DiClemente, 2015-03-09. The bestselling textbook to understanding health research, updated and expanded *Research Methods in Health Promotion* provides students and practitioners with essential knowledge and skills regarding the design, implementation, analysis and interpretation of research in the field of health promotion. Now in its second edition, this bestselling textbook has been updated with more recent research methodologies and additional information on sampling, participatory and survey research and qualitative data analysis. The entire research process is covered with specific points relating to both qualitative and quantitative research. By breaking the daunting process of research into simple and well-defined steps, this user-friendly text encourages students to think about research as a sequential process and provides explanations that facilitate better understanding of each step in the research process. A separate set of chapters covers the more quantitative methodological areas including designs, measurement, sampling and data analysis in depth, giving readers the understanding they need to apply in practice. This book also provides applied chapters that illustrate the practical aspects of the research process along with other critical information including grant writing and scientific writing. Evaluate the ethics design, analysis and interpretation of research. Identify and understand the key components of research studies. Analyze and interpret the results of experimental and survey research designs. Understand the process of publishing a research report and constructing a grant proposal. *Research Methods in Health Promotion* is ideal for both undergraduate and graduate methods courses in health promotion and public health.
