

DIAGNOSTIC REPORTS IN SPEECH- LANGUAGE PATHOLOGY: A SPEECH-LANGUAGE PATHOLOGIST'S WRITTEN LIAISON

INTRODUCTION:

Almost all health science professions use some form of a diagnostic report. The general definition of a diagnostic report is a standardized report that summarizes the medical history of a client in a clear and concise way that can be understood by any professional in the field. The reason for having diagnostic reports is that they allow a client to switch health care providers without the risk of there being a miscommunication between professionals or between the professional and the client. Say, for example, that a client is taking a medication that cannot be mixed with a certain chemical. This chemical is not the type of thing he would normally interact with so he doesn't know it is a problem. When he moves, his new doctor asks if he's taking any medications, and he cannot pronounce the long chemical name of the medicine, so he tries to explain what it is with no success. The new doctor doesn't worry about it and in one of the tests, gives him the chemical that is contraindicated by his medication, and it causes severe complications.

The point of a diagnostic report in that scenario would be to allow the new doctor to look on his medical records and see that his client takes this medication. Assuming that he is a well-educated doctor, he would then be able to know that the test with the chemical would be contraindicated. In Speech-Language Pathology, there are rarely cases that would have that level of severity if misunderstood, but there are tests that could be re-administered for no reason, and one's speech therapy progress could go unknown if there is no diagnostic report.

It is self-evident that this is the reason diagnostic reports are written, but why are they written the way they are? What does each section of a diagnostic report say about the doctor that writes it? Because this paper is not explaining what a diagnostic report is, but why it is, it is necessary to look a step deeper. A diagnostic report is a genre that lends itself as an excellent example of what Berkenkotter and Huckin (1993) call "situatedness". In their article they define situatedness as the necessity to participate within, "the communicative activities of daily and professional life." (482). Each health care profession is in itself, a discourse community, but also, every office has its community as well. The real purpose of a diagnostic report is to be a liaison between the smaller discourse communities to allow for the universal comprehension of the larger discourse community of, in this case, all the speech-language pathologists within a language.

A Guide to Clinical Assessment and Professional Report Writing in Speech-Language Pathology Renee Fabus, 2024-06-01

Learning to assess speech and language disorders and write diagnostic reports may be an overwhelming experience especially when most texts don't cover both topics at once. With that in mind, *A Guide to Clinical Assessment and Professional Report Writing in Speech Language Pathology* Second Edition combines the latest assessment protocols and diagnostic techniques with vital diagnostic report writing tools into a single definitive guide. Cyndi Stein, Rubin, Renee Fabus, and their contributors recognize that clinical assessment is inextricably linked to report writing and have updated this Second Edition to synthesize the two. Following the introductory chapters which discuss the basics of assessment and report writing, each subsequent chapter focuses on a particular disorder, provides in-depth assessment tools, and presents a corresponding sample report.

Key Features: An inventory and explanation of formal and informal assessment measures. A glossary of key vocabulary. Sample case histories with assessment tools. Relevant and useful interview questions. Each disorder's background and characteristics. Assessment parameters. A differential diagnosis section. A model report.

The accessible format of *A Guide to Clinical Assessment and Professional Report Writing in Speech Language Pathology* Second Edition will help students learn how to assess and document speech and language disorders and will also make for a perfect reference for them as clinicians for years to come.

Diagnostic Report Writing In Speech-Language Pathology Steven Blaustein, 2024-06-01
