of school getting into a job and doing illegal things are intertwined over the life course and how these relations differ with age and gender The background of this volume is our interest in the often studied relation between offending and employment or more generally between offending and the transition from school to work including dropping out part time work and joblessness The available literature casts little doubt that employment and education are indeed related to less crime and offending However this relation is much more complex than it appears at first hand The volume is primarily aimed at researchers and students in the fields of criminology sociology and economics However it may also be of use for non academic professionals in particular policy makers and practitioners in the field of criminal justice probation rehabilitation and youth schools
