Choosing Students Wayne Camara, Ernest W. Kimmel, 2005-03-23 This volume brings a variety of perspectives to bear on the issue of how higher education institutions can or should choose students during the early part of the 21st century Many of the contributors report on research to develop and validate potential tools to assist those responsible for admission decisions Other contributors however pose broader questions about the nature of selective admissions about institutional responses to the changing demography of those seeking to enter higher education or about the appropriate criteria of success in higher education The volume is particularly timely because the question of how changes in admission tools and processes will affect campus diversity following the recent Supreme Court decision concerning the University of Michigan Diversity is an important concern of all of the contributors and the chapter by Lee Bollinger President at Michigan at the time the court cases were filed is particularly relevant This book brings together the research that underlies a variety of proposed approaches to improving the selection of students Providing support for the integrity of the

admissions process and the validity of new tools to help a higher education institution to select a diverse student body this book explores the implications of the assessment component of K 12 school reform for higher education admissions practices The diverse contributions to this volume reflect the current ferment in educational research and educational practice as institutions of higher education seek to develop a new admissions paradigm for coming decades following the University of Michigan decisions This book is intended for those leaders and professionals who set admission policies and practices in American colleges and graduate and professional schools as well as for those scholars and scientists who research develop and validate tools for use in the process of choosing students in ways that are congruent with an institution s mission values and goals

Bridging the Gaps James E. Rosenbaum, Caitlin E. Ahearn, Janet E. Rosenbaum, Janet Rosenbaum, 2017-09-02 College for all has become the new American dream Most high school students today express a desire to attend college and 90% of on time high school graduates enroll in higher education in the eight years following high school Yet degree completion rates remain low for non traditional students students who are older low income or have poor academic achievement even at community colleges that endeavor to serve them What can colleges do to reduce dropouts In Bridging the Gaps education scholars James Rosenbaum Caitlin Ahearn and Janet Rosenbaum argue that when institutions focus only on bachelor s degrees and traditional college procedures they ignore other pathways to educational and career success Using multiple longitudinal studies the authors evaluate the shortcomings and successes of community colleges and investigate how these institutions can promote alternatives to BAs and traditional college procedures to increase graduation rates and improve job payoffs The authors find that sub baccalaureate credentials associate degrees and college certificates can improve employment outcomes Young adults who complete these credentials have higher employment rates earnings autonomy career opportunities and job satisfaction than those who enroll but do not complete credentials Sub BA credentials can be completed at community college in less time than bachelor s degrees making them an affordable option for many low income students Bridging the Gaps shows that when community colleges overemphasize bachelor s degrees they tend to

funnel resources into remedial programs and try to get low performing students on track for a BA Yet remedial programs have inconsistent success rates and can create unrealistic expectations leading struggling students to drop out before completing any degree The authors show that colleges can devise procedures that reduce remedial placements and help students discover unseen abilities attain valued credentials get good jobs and progress on degree ladders to higher credentials To turn college for all into a reality community college students must be aware of their multiple credential and career options Bridging the Gaps shows how colleges can create new pathways for non traditional students to achieve success in their schooling and careers

Gratitude in Low Voices Dawit Gebremichael Habte, 2017-04-18 A candid inspiring memoir of cultural and historical importance from an Eritrean Ethiopian War refugee Michael Bloomberg Dawit Gebremichael Habte fled his homeland of Eritrea as a teenager In the midst of the ongoing Eritrean Ethiopian war Dawit and his sisters crossed illegally into Kenya Without their parents or documents to help their passage they experienced the abuse and neglect known by so many refugees around the world But Dawit refused to give up He stayed resilient and positive Journeying to the United States under asylum and still a boy Dawit found a new purpose in an unfamiliar land Against impossible odds he studied hard and was accepted to Johns Hopkins University eventually landing a job as a software engineer at Bloomberg After a few years with the support of Michael Bloomberg himself Dawit returned to his homeland to offer business opportunities for other Eritreans Dawit found a way to help his ancestral land emerge from thirty years of debilitating war Gratitude in Low Voices is about how one man was marginalized but how compassion and love never abandoned him It s about learning how to care for family and how to honor those who help the helpless This account reminds us that hope is not lost An inspiring memoir by Dawit Gebremichael Habte who poignantly portrays his childhood in Africa and his struggles as a refugee to the United States This book is a reaffirmation of the good that people can do and how one young man succeeded despite the odds against him Foreword Reviews

Gender and Fair Assessment Warren W. Willingham,Nancy S. Cole,2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience Catalog of Copyright Entries.
