Perfection 2 The Perfection Series:

Leibniz's Metaphysics of Time and Space Michael Futch, 2008-04-05 Leibniz's metaphysics of space and time stands at the centre of his philosophy and is one of the high water marks in the history of the philosophy of science. In this work Futch provides the first systematic and comprehensive examination of Leibniz's thought on this subject. In addition to elucidating the nature of Leibniz's relationalism, the book fills a lacuna in existing scholarship by examining his views on the topological structure of space and time, including the unity and unboundedness of space and time. It is shown that like many of his more recent counterparts, Leibniz adopts a causal theory of time where temporal facts are grounded on causal facts, and that his approach to time represents a precursor to non-tensed theories of time. Futch then goes on to situate Leibniz's philosophy of space and time within the broader context of his idealistic metaphysics and natural theology. Emphasizing the historical background of Leibniz's thought, the book also places him in dialogue with contemporary philosophy of science, underscoring the enduring philosophical interest of Leibniz's metaphysics of time and space. Christian Wolff's German Ethics Sonja Schierbaum, Michael Walschots, John Walsh, 2024-02-25 This volume offers collective exploration of major aspects of Christian Wolff's ethics. It focuses on what is arguably Wolff's most important and influential text on moral philosophy, namely his *Rational Thoughts on the Action and Omission of Human Beings for the Promotion of their Happiness*, originally published in 1720 and commonly referred to as the *German Ethics* to distinguish it from his later Latin works on ethics. The contributions cover a range of topics, including the systematic structure of the text itself and the relation between Wolff's ethics and the preceding natural law tradition, and many of the chapters consider the development of the basic tenets of Wolff's moral theory in his later Latin writings. Throughout the volume, special attention is given to the core concepts of Wolff's moral philosophy, such as obligation, perfection, the highest good, and happiness. Other notable topics include Wolff's conception of moral judgment and moral education, as well as the role of psychology and anthropology in his ethical thought. The volume also includes discussion of the influence of Wolff's ethics on subsequent figures, such as C. A. Crusius, G. F. Meier, and Kant. As a whole, the volume seeks to show the importance of Wolff's *German Ethics* within the history of ethics, as well as to inspire others to engage with his thought. **The Political Philosophy of Sri Aurobindo** Vishwanath Prasad Varma, 1990-01-01 **The Works of the Learned Isaac Barrow[...]** Isaac Barrow, 1717
