Self-directed learning research: An imperative for transforming the educational landscape Elsa Mentz,Thabisile Buthelezi,Josef de Beer,Adri du

Toit,Aubrey Golightly,Sarah Gravett,Marietjie Havenga,Anitia Lubbe,Judah P. Makonye,Neal Petersen,Paulinah Phahamane,Jessica Pool,H.J. (Hennie) Steyn,Johannes (Hannes) L. van der Walt,Charl Wolhuter,2016-12-31 This book will benefit specialists in the field of the education sciences It represents significant progress in knowledge production Self directed learning has become increasingly important not only for education in South Africa but also for education sciences in the international arena This is a result of the changing education landscape caused by the demands of the 21st century as well as the rapid change in knowledge production Learners should be equipped with skills to take responsibility for their own learning New innovative strategies should be incorporated into teaching and learning in order to meet the changing demands in education Traditional teacher centred practices are still the norm in most South African schools and higher education institutions and do not adequately prepare students for lifelong learning in the 21st century The content focuses on the theory behind self directed learning explores strategies such as cooperative learning problembased learning case based teaching and large group teaching that enhance self directed learning and the use of blended learning in a self directed learning environment The book demonstrates how self directed learning can be enhanced in mathematics computer science and life science education and through the use of student tutors for geography Digital technology could for example also be used in innovative ways for education in isiZulu folk poetry The findings are based on original empirical research and a sound theoretical conceptual framework In an environment of rapidly changing knowledge production this book responds to the challenge of how to equip learners with the necessary skills to take responsibility for their own learning The book presents innovative teaching and learning strategies for meeting the changing demands in education Group activities the responsibilities of learners and the obstacles that hinder their learning are analysed and the way in which educators can support them is discussed Educational values such as mutual trust are discussed and self directed assessment is explored This is a timely collective work authored by experts who subscribe to the approach of self directed learning Educators should discover new teaching and learning strategies and value the integration of self directed learning in the classroom

The Origin and Growth of Geography as a discipline at South Africa Universities Gustav Visser,Ronnie Donaldson,Cecil

Seethal,2016-09-20 Integrated Productivity in Urban Africa Donald Okeke,2016-08-12 This book introduces readers to neo mercantile planning theory in the context of spatial regional integration in Africa It proposes a new approach that rethinks neo liberalism as the meta theory of planning in Africa and pioneers an original school of thought that presents a general theory of planning for Africa in the twenty first century Research to substantiate the new theory was conducted over the period November 2010 to May 2015 and is presented here in four sections with more than 500 references The book offers comprehensive coverage from the theoretical foundations and framework through application and empirical research to analysis conclusions and recommendations *Mental Practice: Clinical and Experimental Research in Imagery and Action Observation* Magdalena Ietswaart,Andrew J. Butler,Philip L. Jackson,Martin Gareth Edwards,2016-05-18 There is now strong evidence demonstrating that the brain simulates action and other functions Such action simulation can be evoked through conscious mental rehearsal of movement or imagery but also through passive action observation watching movements in others Furthermore there is evidence to suggest that mental rehearsal of movement or mental practice can produce improvements normally attributed to practising actual movements It is currently assumed that such improvements are due to neural activation associated with action simulation However the neuroscience of mental practice efficacy is still poorly understood The aim of this research topic is to clarify the underlying mechanisms of mental practice bringing evidence from cognitive neuroscience experimental neuropsychology sport and movement science and clinical neurology It also attempts to address confusion regarding the concepts of imagery and observation which has hampered the progression of mental practice research both scientifically and applied As well as reviews theoretical and position articles this research topic includes original neuroimaging experimental and patient research addressing among others the following issues Neuroimaging studies provide strong evidence for action simulation but the link to behavioural change and functional outcome is weak What is the evidence that mental practice efficacy is driven by neuroplasticity processes evoked by action simulation This research topic includes contributions on neural correlates and behaviour with regards to imagery and action observation Much of the mental practice efficacy evidence comes from longstanding research within sport science However what does mental practice entail in these contexts and to what extent is it compatible with the cognitive neuroscience perspective of action simulation This research topic will include contributions that consider both evidence and concepts with regards to imagery and action observation in an attempt to build an interdisciplinary consensus on the nature and application of mental practice Mental practice is perceived as a promising motor rehabilitation technique but critically there is lack of clarity or consensus on what mental practice treatment should entail It is also not clear what are the most appropriate outcomes to measure imagery ability and cognitive or behavioural change following mental practice A further important issue that needs consideration as part of this research topic is dosage as it is currently unclear how much mental practice is appropriate and whether this depends on patient variables such as age cognitive functioning motor function or

pathophysiology **The Performance of European Business in the Twentieth Century** Youssef Cassis, Andrea Colli, Harm Schröter, 2016-07-21 This book originated from the idea that performance is what really matters in business and thus in business history Yet surprisingly the analysis of performances has been neglected by economic and business historians This book is a first attempt to fill this gap and in doing so provides a totally new approach to European business history Rather than bringing together national studies it is based on a single database measuring performance in eight European countries according to identical criteria The study spans the entire twentieth century with particular attention to five benchmark moments the height of the first globalisation on the eve of the First World War the late 1920s boom preceding the Great Depression the European reconstruction of the mid 1950s the end of Golden Age in the early 1970s and the height of the second globalisation at the turn of the twenty first century The analysis is based on a sample of 1 225 companies belonging to the three major European economies Britain France and Germany two large south European latecomers Italy and Spain two smaller north western countries Belgium and Sweden and one small Nordic country Finland Performance has been measured using two ratios of profitability return on equity ROE and holding return HR thus providing a complementary measure of profitability the former as seen from the firm s perspective the latter from the investor s perspective The book s findings at times surprising at once confirm and infirm widely held assumptions regarding business performance regarding strategy and structure ownership and control old and new industries emerging and advanced economies Embracing Well-Being in Diverse African Contexts: Research Perspectives Lusilda Schutte, Tharina Guse, Marié P. Wissing, 2022-05-19 This is the first volume providing a research platform to showcase research in the field of positive psychology and well being science in African contexts Next to enhancing context sensitive theory and practice on the African continent it also contributes to the global discourse in positive psychology and facilitates the development of a science that reflects and is relevant to complexity and diversity in a globalising society This volume brings together work from African scholars featuring research on theoretical perspectives on well being in Africa measurement of well being in Africa manifestations and dynamics of well being in Africa and well being promotion in Africa It stimulates further research in positive psychology and well being science in the African context and globally and emphasises the interconnectedness and situatedness of human functioning and well being contributing to a more balanced perspective on well being in an international perspective The volume benefits researchers students and practitioners in Africa and other international contexts who study or apply the science of positive psychology and well being in diverse contexts Chapter 1 is available open access under a Creative Commons Attribution 4 0 International License via link.springer.com Formative Research in Social Marketing Krzysztof Kubacki, Sharyn Rundle-Thiele, 2016-10-07 This book brings together the state of the art and current debates in the field of formative research and examines many of the innovative methods largely overlooked in the available literature This book will help social marketing to move beyond surveys and focus groups The book addresses the

Theologies of Childhood and the Children of Africa Jan Grobbelaar, Gert Breed, Alfred Brunson, Marcia J. Bunge, Sam Ndogo, Hannes (J.J.) Knoetze, Nico Vorster, 2016-12-31 The purpose of this book is to combine perspectives of scholars from Africa on Child Theologies from a variety of theological sub disciplines to provide some theological and ministerial perspectives on this topic The book disseminates original research and new developments in this study field especially as relevant to the African context In the process it addresses also the global need to hear voices from Africa in this academic field It wants to convey the importance of considering Africa's children in theologising The different chapters represent diverse methodologies but

the central and common focus is to approach the subject from the viewpoint of Africa's children. The individual authors varied theological sub-disciplinary dispositions contribute to the unique and distinct character of the book. Almost all chapters are theoretically orientated with less empirical research, although some of the chapters refer to empirical research which the authors have done in the past. Most of the academic literature in the field of Theologies of Childhood is from American or British European origin. The African context is fairly absent in this discourse, although it is the youngest continent and presents unique and relevant challenges. This book was written by theological scholars from Africa focussing on Africa's children. It addresses not only theoretical challenges in this field but also provides theological perspectives for ministry with children and for important social change. Written from a variety of theological sub-disciplines, the book is aimed at scholars across theological sub-disciplines, especially those theological scholars interested in the intersections between theology, childhood studies and African cultural or social themes. It addresses themes and provides insights that is also relevant for specialist leaders and professionals in this field. No part of the book was plagiarised from another publication or published elsewhere before.

Theology and the (post)apartheid condition Rian Venter, 2016-12-01 Knowledge transmission and generation belong to the core mission of the public university. In democratic South Africa, the transformation of these processes and practices in higher education has become an urgent and contested task. The Faculty of Theology at the University of the Free State has already done some original work on the implications of these for theology. One area of investigation that has not yet received due attention concerns the role of theological disciplines and especially the relation between academic disciplines and societal dynamics. This research project addresses the challenge and this volume reflects the intellectual endeavour of lectures, research fellows and a post graduate student associated with the faculty. Each theological discipline has its own history and has already experienced reconstruction both globally and in South Africa. Some of these genealogical developments and re-envisioning are mapped by the contributions in this volume. The critical questions addressed are what are the contours of the post-apartheid condition and what are the implications for responsible disciplinary practices in theology. The chapters convey an impression of the vitality of theology at the University of the Free State and in South Africa and give expression to fundamental shifts that have taken place in theological disciplines and also of future tasks. This research project aims to stimulate reflection on responsible and innovative disciplinary practices of theology in South Africa which we envisage will contribute to social justice and human flourishing. Rian Venter, University of the Free State.

Global Environmental Constitutionalism in the Anthropocene Louis J Kotzé, 2016-09-22 There is persuasive evidence suggesting we are on the brink of human-induced ecological disaster that could change life on Earth as we know it. There is also a general consensus among scientists about the pace and extent of global ecological decay, including a realisation that humans are central to causing the global socio-ecological crisis. This new epoch has been called the Anthropocene. Considering the many benefits that constitutional environmental protection holds out in domestic legal orders

it is likely that a constitutionalised form of global environmental law and governance would be better able to counter the myriad exigencies of the Anthropocene This book seeks to answer this central question from the perspective of the Anthropocene what is environmental constitutionalism and how could it be extrapolated to formulate a global framework In answering this question this book offers the first systematic conceptual framework for global environmental constitutionalism in the epoch of the Anthropocene
