The Norton Field Guide to Writing with Readings and Handbook, 2013 **Community how to Guide on Underage Drinking Prevention: Self sufficiency**, 2001 **Conceding Composition** Ryan Skinnell, 2016-09-01 First year composition became the most common course in American higher education not because it could fix underprepared student writers but because it has historically served significant institutional interests That is it can be conceded in multiple ways to help institutions solve political promotional and financial problems Conceding Composition is a wide ranging historical examination of composition s evolving institutional value in American higher education over the course of nearly a century Based on extensive archival research conducted at six American universities and using the specific cases of institutional mission regional accreditation and federal funding this study demonstrates that administrators and faculty have introduced reformed maintained threatened or eliminated composition as part of negotiations related to nondisciplinary institutional exigencies Viewing composition from this perspective author Ryan Skinnell raises new questions about why composition exists in the university how it exists and how teachers and scholars might productively reconceive first year composition in light of its institutional functions The book considers the rhetorical political organizational institutional and promotional options conceding composition opened up for institutions of higher education and considers what the first year course and

the discipline might look like with composition's transience reimagined not as a barrier but as a consummate institutional value

Charitable Writing Richard Hughes Gibson, James Edward Beitler, 2020-12-15 How might we love God and our neighbors through the task of writing This book offers a vision for expressing one's faith through writing and for understanding writing itself as a spiritual practice that cultivates virtue Drawing on authors and artists throughout the church's history we learn how we might embrace writing as an act of discipleship for today

Upsetting Composition Commonplaces Ian Barnard, 2014-10-15 In *Upsetting Composition Commonplaces* Ian Barnard argues that composition still retains the bulk of instructional practices that were used in the decades before poststructuralist theory discredited them While acknowledging that some of the foundational insights of poststructuralist theory can be difficult to translate to the classroom Barnard upends several especially intransigent tenets that continue to influence the teaching of writing and how students are encouraged to understand writing Using six major principles of writing classrooms and textbooks clarity intent voice ethnography audience and objectivity Barnard looks at the implications of poststructuralist theory for pedagogy While suggesting some evocative poststructuralist pedagogical practices the author focuses on diagnosing the fault lines of composition's refusal of poststructuralism rather than on providing solutions in the form of teaching templates *Upsetting Composition Commonplaces* addresses the need to more effectively engage in poststructuralist concepts in composition in an accessible and engaging voice that will advance the conversation about relations between the theory and teaching of writing

Expanding the Canon Melissa Hoag, 2022-12-30 Directly addressing the underrepresentation of Black composers in core music curricula *Expanding the Canon Black Composers in the Music Theory Classroom* aims to both demonstrate why diversification is badly needed and help faculty expand their teaching with practical classroom oriented lesson plans that focus on teaching music theory with music by Black composers This collection of 21 chapters is loosely arranged to resemble a typical music theory curriculum with topics progressing from basic to advanced and moving from fundamentals diatonic harmony and chromatic harmony to form popular music and music of the twentieth and twenty first centuries Some chapters focus on segments of the traditional music theory sequence while others consider a single style or composer Contributors address both methods to incorporate the music of Black composers into familiar topics and ways to rethink and expand the purview of the music theory curriculum A foreword by Philip Ewell and an introductory narrative by Teresa L Reed describing her experiences as an African American student of music set the volume in wider context Incorporating a wide range of examples by composers across classical jazz and popular genres this book helps bring the rich and varied body of music by Black composers into the core of music theory pedagogy and offers a vital resource for all faculty teaching music theory and analysis
