Why should I create a custom image with the operating system of the target machine?

An image is a snapshot of a virtual machine (VM) that can be used to create new VMs. It is a snapshot of the state of the VM at the time it was created.

How can I create a custom image for a specific operating system? What are the steps to follow?

Get the image ID

1. To get the image ID, use the `oci image list` command to list all images in the image catalog.

Why is the image ID not the same as the image name? What is the difference between the image ID and the image name?

The image ID is a unique identifier for the image in the image catalog. The image name is a human-readable name for the image.
