Mathematical Intelligence Junaid Mubeen,2022-06-02 There s so much talk about the threat posed by intelligent machines that it sometimes seems as though we should surrender to our robot overlords But Junaid Mubeen isn t ready to throw in the towel just yet As far as he is concerned we have the creative edge over machines because of a remarkable system of thought that humans have developed over the millennia It s familiar to us all but often badly taught in schools and misrepresented in popular discourse maths Computers are of course brilliant at totting up sums pattern seeking and performing mindless tasks of well computation For all things calculation machines reign supreme But Junaid identifies seven areas of intelligence where humans can retain a crucial edge And in exploring these areas he opens up a fascinating world where we can develop our uniquely human mathematical superpowers *The Challenges of the Humanities, Past, Present, and Future* Albrecht Classen,2018-10-08 This book is a printed edition of the Special Issue The Challenges of the Humanities Past Present and Future Volume 1 that was published in Humanities *Monographs in Tang Official Historiography* Daniel Patrick Morgan,Damien Chaussende,2019-09-19 This book examines the role of medieval authors in writing the history of ancient science It features essays that explore the content structure and ideas behind technical writings on medieval Chinese
