since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis

Negotiating Public Services in the Congo Tom De Herdt, Kristof Titeca, 2019-06-15 The Democratic Republic of Congo DRC has been widely derided as a failed state unable to meet the basic needs of its citizens But while state infrastructure continues to decay many essential services continue to be provided at the local level often through grassroots initiatives So while for example state funding for education is almost non-existent average school enrolment remains well above average for Sub-Saharan Africa This book addresses this paradox bringing together key scholars working on public services in the DRC to elucidate the evolving nature of governance in developing

countries Its contributions encompass a wide range of public services including education justice transport and health Taking stock of what functions and why it contributes to the debate on public services in the context of real or hybrid governance beyond the state does the state still have a function or is it no longer useful and relevant Crucially how does international aid help or complicate this picture Rich in empirical detail the contributors provide a valuable work for students and scholars interested in the role played by non state actors in organizing statehood a role too often neglected in debates on post conflict reconstruction
