Objects And Information Structure Irina Nikolaeva:

Objects and Information Structure Mary Dalrymple, Irina Nikolaeva, 2011-06-02 A cross linguistic study of how objects are affected by information structure **The expression of information structure in Bantu** Jenneke van der Wal, 2025-03-18

The Bantu language family is spread over a large area of Africa stretching from Cameroon to Kenya to South Africa and comprises an estimated 555 languages. The languages show a large amount of small scale variation while at the same time forming part of one relatively uniform family within Niger Congo. Interestingly the morphosyntax of these languages has been observed to be heavily influenced by information structure. Studying the expression of information structure in Bantu is therefore of great importance not only for developing cognitive models of the role of information structure in language but also for understanding the basic grammatical structure of the Bantu languages themselves. Before modelling the interaction between syntax and information structure in Bantu however a thorough empirical description of the expression of information structure in Bantu should be available. That description is what this book aims to provide. This book follows from a systematic investigation of information structure in the languages of the BaSIS research project Bantu Syntax and Information Structure. The data come from original field research conducted using the BaSIS methodology which was specifically developed to investigate the expression of information structure in Bantu. The book contains a comprehensive introduction chapter which explains the main terms and issues in the field of information structure the methodology employed in the project and common structures which characterise topic and focus expression in Bantu. The introduction is then followed by eight chapters which each give detailed descriptive overviews of the expression of information structure in a different Bantu language namely Tunen Guthrie classification A44 Cameroon Teke Kukuya B77 Congo K tharaka E54 Kenya Kirundi JD62 Burundi Rukiga JE14 Uganda Kinyakyusa M31 Tanzania Makhuwa Enahara P31 Mozambique and Cicopi S61 Mozambique. Taken together the book provides detailed information on the expression of information structure in the Bantu family. It is intended both to inform future theoretical work and to provide a methodology and model for the investigation of information structure that can be used in studies of other languages. **Affectedness at the Morphosyntax-Semantics**

Interface Semra Kızılkaya, 2024-07 The monograph explores the semantic and morphosyntactic representation of affectedness i.e. the property of an event participant to undergo change in transitive predicates. Specifically it provides a first in depth investigation of how affectedness the notion of path and resultativity determine Differential Object Marking DOM in Turkish. It argues that affectedness is the crucial event semantic characteristic enhancing DOM and articulates a theoretical link between affectedness in the lexical syntactic structure and morphological accusative marking. The study addresses affectedness from a cross linguistic perspective and makes a remarkable contribution to our understanding and modelling of the syntax semantics interface. 曹逢甫, 2021-10-01 *Colloquial English* Andrew Radford, 2018-06-14

A brilliant analysis of colloquial English both its syntax and its variations using novel data from live unscripted radio and TV

Transitivity, Valency, and Voice Denis Creissels, 2024-10-15 This book sets up a consistent theoretical and terminological framework for the study of the phenomena that are commonly subsumed under the terms transitivity valency and voice These three concepts are at the heart of the most basic aspects of clausal structure in any language however there is considerable cross linguistic variation in the constraints on how verbs combine with noun phrases that refer to participants in the event that they denote or to the circumstances of the event In this book Denis Creissels explores and accounts for the extent of this cross linguistic variation capturing its regularities and examining the historical phenomena that have resulted in the emergence of constructions and markers The novel framework developed in the book allows similar phenomena to be identified across typologically diverse languages and facilitates systematic comparison of the manifestations of these phenomena in the grammars of individual languages

Valency over Time Silvia Luraghi, Elisa Roma, 2021-10-25 Valency patterns and valency orientation have been frequent topics of research under different perspectives often poorly connected Diachronic studies on these topics is even less systematic than synchronic ones The papers in this book bring together two strands of research on valency i e the description of valency patterns as worked out in the Leipzig Valency Classes Project ValPaL and the assessment of a language s basic valency and its possible orientation Notably the ValPaL does not provide diachronic information concerning the valency patterns investigated one of the aims of the book is to supplement the available data with data from historical stages of languages in order to make it profitably exploitable for diachronic research In addition new research on the diachrony of basic valency and valency alternations can deepen our understanding of mechanisms of language change and of the propensity of languages or language families to exploit different constructional patterns related to transitivity

Morphological Complexity Matthew Baerman, Dunstan Brown, Greville G. Corbett, 2017-06-22 This book characterises the diverse morphological complexity we find in the languages of the world Richly illustrated examples are drawn from dozens of different languages and are subjected to rigorous quantitative analysis It will be ideal reading for academic researchers and graduate students of linguistics with a special interest in morphology and English language

Lenition and Vowel Lengthening in the Germanic Languages Kurt Goblirsch, 2018-05-24 The interrelationship between three major quantity changes in the history of the Germanic languages gemination lenition and open syllable lengthening
