Virtual Exchange for Intercultural Language Learning and Teaching Anthippi Potolia, Martine Derivry-Plard, 2022-09-19. This book illustrates new virtual intercultural practices for language learning from primary to tertiary education and highlights the transversality of these practices throughout the language curriculum. The current English as a Lingua Franca (ELF) perspective sets the framework as a possible vector of cultural exchanges in a variety of contexts and from which the different authors, coming from Europe and all over the world, present their studies. The book deploys diverse educational exchanges within a wide range of technological tools and with varied approaches to the intercultural dimension in language learning. Through these virtual exchanges, different languages and educational cultures come together to create emerging communities of practice co-constructed for the limited time space of the collaborative projects. This volume opens a dialogue with researchers from different backgrounds and theoretical and methodological perspectives as technology can no longer be apprehended without its purposeful human and semiotic meanings and conversely human and semiotic meanings can no longer be apprehended without Information and Communication Technology (ICT). Going beyond strict polarised views on the technology or humanistic approaches, this book presents a more nuanced interrelated stance and will appeal to researchers, scholars, post-graduate students and teachers in applied linguistics, language learning and teaching, education, information studies, cultural studies and intercultural communication.
