**Nursing** Greta Thornbory, Susanna Everton, 2017-10-24 This textbook now thoroughly revised and updated provides a practical guide for those in training or practising within occupational health nursing Concerned with the health of people at work and the effects of work on health and health on work this distinctive branch of public health nursing requires specific knowledge and skills Contemporary Occupational Health Nursing includes chapters on public health leadership health promotion and protection health surveillance health assessment case management and rehabilitation mental health management of occupational health services and epidemiology and research quality assurance and audit The second edition includes additional content on health risk assessment and the Fit for Work Service occupational health management systems psychosocial factors and mindfulness among other things Discussion of ethical issues is woven throughout and each chapter is written by an experienced occupational health nurse practitioner and includes features such as case studies activities learning objectives and chapter summaries This book can be used as a text by those undertaking specialist community public health nursing qualifications and as an important resource for all nurses working in occupational health practice

Longitudinal Research in Occupational Health Psychology Toon Taris, 2017-10-02 Occupational health psychology OHP involves the application of psychology to improving the quality of work life and to promoting and protecting the safety health and well being of employees Achieving these aims requires researchers and practitioners to possess in depth knowledge of the processes that are presumed to bring about the desired outcomes To date most studies in OHP have relied on cross sectional designs in examining these processes In such designs all variables of interest are measured simultaneously Although this has generated useful insights in how particular phenomena are associated such designs cannot be trusted

when it comes to drawing causal inferences association is not causation This book therefore focuses on longitudinal research designs in OHP whereby the concepts of interest are measured several times offering much stronger evidence for causal relationships The authors focus on design issues in longitudinal research such as the number of measurements chosen and the length of the time lags between these measurements and illustrate these issues in the context of applied research on topics such as the work family interface conflict at work and employee well being By doing so this volume provides a state of the art overview of current research in OHP both in terms of its findings and methodologies This book is based on a special issue of the journal Work Stress

*The Medical Student's Survival Guide* Elizabeth Cottrell, David Mitchell, 2017-11-22 To the unsuspecting wearing a stethoscope could not be more easy You pick it up place it around your neck and hey presto you look like you know what you are doing and people think you are a doctor This is the no nonsense guide to the reality of medical student life Everything you need to know is here What are my chances of delivering a baby How many questions should I ask How do I insert a nasogastric tube without the patient knowing it s my first time Where will I live when I m on clinical rounds Why can t I wear trainers Will patients like me What is a patient s pack year history How do I break bad news How can I get more sleep And much much more
